Chapter One

By way of introduction

The term "dictionary" came into the English language from the Latin word "dictionarium" whose origin in Latin is "diction" which means "a saying" from Latin "dicere" which in turn means to speak.

Noah Webster defined the term dictionary as "a book containing the words of a language arranged in alphabetical order, with definitions, etymologies, pronunciations and other information". Webster added that in bilingual dictionaries the equivalent could be in another language. It could also be used in any science, art or other branches of knowledge or work or by any class of people.

A dictionary, according to the Franklin electronic Encyclopedia, is a published list, in alphabetical order, of the words of a language, explaining and defining them, or, in the case of a bilingual dictionary, translating them into another languages.

Modern dictionaries also provide hyphenation, synonyms, derived forms, and etymology. The modern dictionary is often prescriptive, attempting to establish certain forms as preferable.

In the 20th century American dictionary makers began to adopt criteria of use rather than of etymological purity, somewhat in advance of similar developments in linguistics.

Dictionaries were produced in China, Greece, the Islamic world and other complex early cultures. The first modern examples of lexicography, however, are thought to be the Nathan Bailey's Universal Etymological English Dictionary (1721) and his larger Dictionarium Britannicum (1730) which served Samuel Johnson in preparing his Dictionary of the English Language (1755) which is considered to be the first dictionary standard work in English.

The next great lexicographer was an American, Noah Webster, whose immensely popular Spelling Book, first appeared in 1783, followed by his Compendious Dictionary

of the English Language (1806). Webster's American Dictionary of the English Language (1828) has been skillfully revised and abridged over the years, thereby retaining its popularity. A six-volume American Encyclopedic dictionary, The Century Dictionary, was completed in 1891.

British lexicographers from the 19th century on began to collect and organize examples of usage. In 1857, the philological society began collecting dated examples of usage, culminating in the publication of the unrivaled lexicon known as the New English Dictionary, the Oxford English Dictionary (OED), or Murray's Dictionary (for Sir James A. H. Murray, one of the editors (1928) and a second edition 1989 of such a dictionary, two major shorter editions exist: "The Concise Oxford Dictionary of current English, and the shorter Oxford English Dictionary.

Other advances in lexicography are reflected in the frequently revised Collegiate or Desk dictionary, an up-to-date abridgement of a larger work, such as the Webster's

New Collegiate Dictionary, based on Webster's 3rd New International Dictionary 1966.

The major concern of a dictionary is to give the meaning(s) of the entries it includes. If a dictionary is bilingual those meanings are to be given in the target language taking into consideration linguistic and cultural aspects of meaning.

This is a painful process on the part of a dictionary maker: especially if the use of language in linguistic and non-linguistic environments and in real life situations are to be taken into consideration.

If, for instance, a particular entry belongs to more than one part of speech, its occurrence in all these cases has to be explained and exemplified.

Some dictionaries indicate the field or discipline to which a particular entry belongs to: science, medicine, law, religion, literature, etc. Dictionaries might also indicate the origin of entries. If the language in question is English, a dictionary

might specify that such a word is an Anglo-Saxon, Greek, Latin or Arabic origin.

As far as the specific meaning of a word is concerned, a dictionary mono- or bilingual could give a list of possible meanings. The number of meanings of a particular entry depends on the different contexts it can be used or it can occur in. A dictionary compiler has to investigate all the possible instances in which a particular entry has or had occurred and then list all these possible meanings. The compiler of a bilingual dictionary is usually expected to exert a double effort. If he restricts himself to a translation of the meaning(s) given to a particular entry on their face value without an investigation of the samples, examples, cases, occasions or contexts these entries were used in, the exact meaning is not easily transferable to the target language.

Due to cultural and historical developmental difference between any two languages (e.g. English and Arabic) giving the exact meaning of a particular entry cannot always be perfect. The context in which a particular entry is

used sheds light and conveys its exact meaning. That is why stating examples from different sources and different contexts in which a particular entry is used will relay the safest, closest and most natural and dynamic equivalence of a particular entry into another language.

Since language penetrates into every aspect of human life, these different aspects have their own worlds or fields of words. Economics, politics, law, medicine, health, science with its fields, humanities with all the fields and sub-fields comprising them have specific terminology. A compiler of a dictionary is not expected to be an expert in all disciplines and worlds of academia. In his compiling of a dictionary, he usually resorts to dictionaries compiled for each field i.e. "specialized dictionaries".

There are for instance dictionaries for medical, economic, diplomatic, artistic, literary, political and other academic, practical intellectual terms, fields and activities in human life.

A dictionary compiler is expected to include such classification and specification of the entries used in his or her work.

No single dictionary can be so rich and comprehensive to include in between its covers all the terms, or entries making up the field and sub-fields of knowledge mentioned above.

Based on that a translator frequently finds himself resorting to specialized dictionaries in order to arrive at the closest natural dynamic and exact meaning of a particular entry.

Dictionaries are always arranged alphabetically; some dictionaries, however, classify their entries into families of words or according to the subject matter at hand. These families include synonyms and related antonyms. Such dictionaries are called thesaurus. Ordinary dictionaries may have some of the features characterizing a thesaurus when they classify entries into families, groups or classes giving symbols to each group or class. Such a process is a painful one. It might be considered many dictionaries in one.

Dictionaries included thousands of words. All of which are known to some speakers of the language. But no dictionary can list all possible words since it is possible to add to the vocabulary of a language in many ways. There are always gaps in the lexicon- these are words that are not in the dictionary but that can be added. Some of the gaps as Franklin and Rodman 1998 said is due to the fact that a permissible sound sequence has no meaning attached to it like: "blick" slarm or "krobe". There are words that come into a particular language because of certain cultural events, states or technical developments, "intifadah" "modern" "sim". Such terms take time to get into a dictionary- if they have a chance.

Dictionaries have also to be distinguished from lexicons. It is well-known that the meaning of a word is inherent in it in a subtle way that is difficult to specify. However, the use of a word is a matter of record; it exists in sentences that have been uttered. Modern dictionaries, as stated earlier, do not restrict their job to listing words and their meanings adjacent to them; they simply indicate the ways in which words are used. Modern editors of dictionaries generally do

not sit down, select a word, and ask what it means. Instead, they glean sentences in which that word occurs from the literature of the language, sort the sentences into groups in which the word appears to be used in the same way, and select the best paraphrases to characterize each usage. From sentences of record, some sort of intended meaning is inferred, and this meaning is further described through paraphrases. Thus, a good dictionary will give at least one example of each "meaning" of a word; the chosen example was actually used (among many others) to establish that "meaning".

If we consider the sample dictionary entries cited in this book, we would find that in addition to examples of usage, entries provide other helpful information, such as syllabication, pronunciation, part of speech, and, sometimes, linguistic history, colloquial usage and synonyms.

Dictionaries, then, provide not only semantic information about entries but phonological morpho-syntactic and socio-linguistic information.

Linguists deal with the lexicon. Much of the above information is incorporated by them in the lexicon, which is a specialized dictionary.

The basic differences between dictionaries and the lexicons are as follows: dictionaries tend to provide a linguistic history of the word, synonyms, and examples of sentences in which the word is used. Furthermore, they sometimes distinguish among standard, colloquial, archaic and other usages of a word. Lexicons on the other hand are arranged according to semantic content or phonological content rather than spelling. Lexicons may also provide information about the possible logical relations assumed by an item. For example, the verb "BUY" assumes four nouns related to it: a buyer, a seller, some goods that are bought, and the money used to obtain the goods. Finally most of the time, we notice that lexicons listing units other than words, namely affixes and idioms, some of which may be listed in dictionaries.

Items or entries in a dictionary are listed and arranged alphabetically. In a lexicon, however, the question is how

items are stored. One, however, should be cautious when using the metaphor of physical storage in describing the lexicon; how lexical items are actually stored in the mind is a major issue in psycholinguistics.

Lexical items might be organized in two major ways:

- according to their phonological content or
- according to their semantic content.

As an example of the first method, consider the noun BANK. It is possible to list at least three basic definitions for this term, as follows:

بنك BANK1: a place of storage for money or other valuables

ضفة BANK2: land that rises from the edge of a body of water

صف BANK3: a row of objects

The lexicon might list all three of these definitions under the form *bānk*. This scheme is an oversimplified approximation of the method employed by traditional dictionaries, which would group the three definitions under a single form spelled *b-a-n-k*. Lexical items may also be

grouped according to their semantic, rather than their phonological similarity. BANKI would then be grouped with such items as SAFE and VAVLT because all three terms have similar meanings.

Another problem in lexical representation is the multiplicity of meanings of certain common words such as GOOD and EAT. "Eat" is cited as an example in the next chapter however one could add to that "eat his heart out" يموت غرقا "eat his words" يتلعثم . As for "Good", for instance, we notice that in expressions like "good government" حكومة جيدة good apples تفاح طيب, "good times" لوقت سعيدة and "good upbringing" تربية صالحة, the meaning of "good" varies with the noun it modifies.

All what is said about dictionaries in this book takes into consideration a translator and the process of translation in general.

Those who compile dictionaries do not always have in mind translators or interpreters. This is the case of mono-lingual dictionary compilers even bilingual dictionary compilers do

not always have the translator in mind. Both have in mind a target audience, namely somebody developing knowledge about a language or two languages not necessarily for the purpose of translation.

In this academic field "translation" dictionaries are studied with translations and the translation process in mind. It has to be said, however, that the moment a translator can do without a dictionary is a great moment of perfect bilingualism. Unfortunately this is not attainable; that is where there have to be dictionaries mono-and bilingual; and there have to be books on dictionaries. And that is why there is such a book.

This book is made up of two parts: the first one includes two chapters. One presents introductory remarks on dictionaries, their definition concerns and kinds. The second looks into the knowledge of words a dictionary is supposed to reflect. Such knowledge includes phonological, morpho-syntactic and semantic.

The second part of the book has six chapters.

Chapter Two

Knowledge of Words (Dictionary word information)

The best dictionary is one that reflects a native speaker's knowledge of his or her words phonetically, orthographically, morpho-syntactically, semantically and stylistically. This is supposedly the case of mono-lingual dictionaries and when it comes to bilingual dictionaries, this knowledge has to be doubled. In addition to all the branches of knowledge, that have to be activated in compiling a mono- or bilingual dictionary, the cultural dimension of language in general and use of words in particular is quite essential.

1. Orthography and Syllabication

A dictionary includes the spelling of every entry in a particular language. Some dictionaries provide the spelling of derived items from the base entries comprising the crux of a dictionary. If there are different spellings of a particular entry, as is the case in some American and British spelling of certain words, a dictionary is expected to point that out.

Examples:

American English	British English
Labor	Labour
Color	colour
Behavior	behaviour
Center	centre
Neighbor	neighbour
Program	programme
Honor	honour

There are certain dictionaries interested in language's historical dimension. Such dictionaries would provide the original spelling of a particular entry. And they would indicate the original spelling: Old English, Middle English,

or even Latin, Greek or French spelling if the word has its origin in such languages.

As for syllabication, some dictionaries tend to parse a word or divide it into the basic syllables it is made up of if it is multi-syllabic. Such examples can be seen in some of the samples copied from dictionaries that implement such a pattern.

Such a process would simplify and clarify another phonological process, namely stress placement on words. Dictionary editors or compilers vary in their approaches to syllabication and stress placement of multi-syllabic words. Some provide spaces in between the syllables a multi-syllabic word is made up of, and they assign different degrees of stress to each word. Others do not subject a word to syllabication, but assign a primary stress on the major syllable of a word.

In English, for instance, there are four degrees of stress: primary, tertiary, secondary and weak (or no stress).

Dictionary editors make use of the first one to mark the major accent or stress of a multi-syllabic word. Others use two degrees, primary and secondary. The symbols used vary from a dictionary to another but the most common is | | others would use something like a comma | ' |. The comma or | ' | in bold type mark the primary stress when they are light the stress is tertiary or secondary.

You can check the samples copied from various dictionaries.

2. Phonetic Transcription

A good dictionary, mono- or bilingual, is expected to provide a guide for pronouncing words in addition to a phonemic or even phonetic transcription of the entries included. The transcription is usually provided for the base or root of an entry not for the derived items unless a change in spelling or stress placement takes place: appear/ apparent, example/ exemplify.

It is well known that there is no one to one relationship between the letters comprising or making up a word and the sounds through which it is produced. English is a language where such a situation is quite apparent; this is the language we are exemplifying here.

This lack of matching is so frequent in the case of vowels. A vowel letter in spelling may be pronounced in many ways.

The vowel letter (a) may have a number of different vowel sounds:

The "a" of "fat" is pronounced /æ/

The “a” of “fate” is pronounced /ei/

The “a” of “far” is pronounced /a:/

The “a” of “fall” is pronounced /ɔ:/

The opposite is true; i.e. a vowel sound may have a number of vowel letters. The vowel sound / i:/ could be orthographically “ea” as in “eat” or “eo” as in “people”, “ei” as in deceive or “ie” as in “believe”, etc.

(the rule for the order of i + e in English is:

i before e when the pronunciation is i: except after c, the only exception is the word seize). Examples:

ceiling, receive, conceive, deceit, conceit,

field, believe, relieve,

The International Phonetic Alphabet (IPA) has an inventory of symbols that can stand for any sound in language. Even sounds that are not part of the sound inventory of a particular language, can be found in the (IPA). There are variations among users of such symbols.

A dictionary editor can use whichever combination he/she likes or sees fit on condition that he/she would remain consistent throughout the whole work.

A good dictionary is one that provides whatever phonetic or orthographic information needed or required, so that any user would benefit from such information, especially when language is a relationship between sounds/ letters and meanings.

3. Morpho- syntactic information

A dictionary is expected to provide the necessary morpho-syntactic information about an entry.

With regard to morphological information, a dictionary user is not expected to be an expert on morphology which is the study of morphemes or words which are the meaning-bearing units in language. Basics, however, are a must. Morphemes are divided into two types, bound and free. The first is a dependent element that cannot stand alone and the latter is independent which can also be called a word.

Bound morphemes are the affixes (prefixes, infixes and suffixes) added to free morphemes for inflection or derivation. Inflectional morphemes are the affixes that may or may not change the part of speech of a word. They indicate certain grammatical properties associated with nouns, verbs and adjectives such as gender (hero, heroin), number (boy, boys), case (he, him) and tense (shave, shaves, shaved)

Those that do not change the part of speech in English are:

- 3rd person /s/ on verbs: write, write(s)

- /s/ on the plural of nouns: cat, cat(s)
- ed of the verb past or past participle forms: walk, walk(ed)
- ing, the verb progressive marker: ... is walk(ing).

There are suffixes, however, that change the part of speech; these are called derivational suffixes:

- | | | |
|--------|--------------|----------------|
| - tion | hesitate (v) | hesitation (n) |
| - dom | free (adj) | freedom (n) |
| - ness | happy (adj) | happiness (n) |

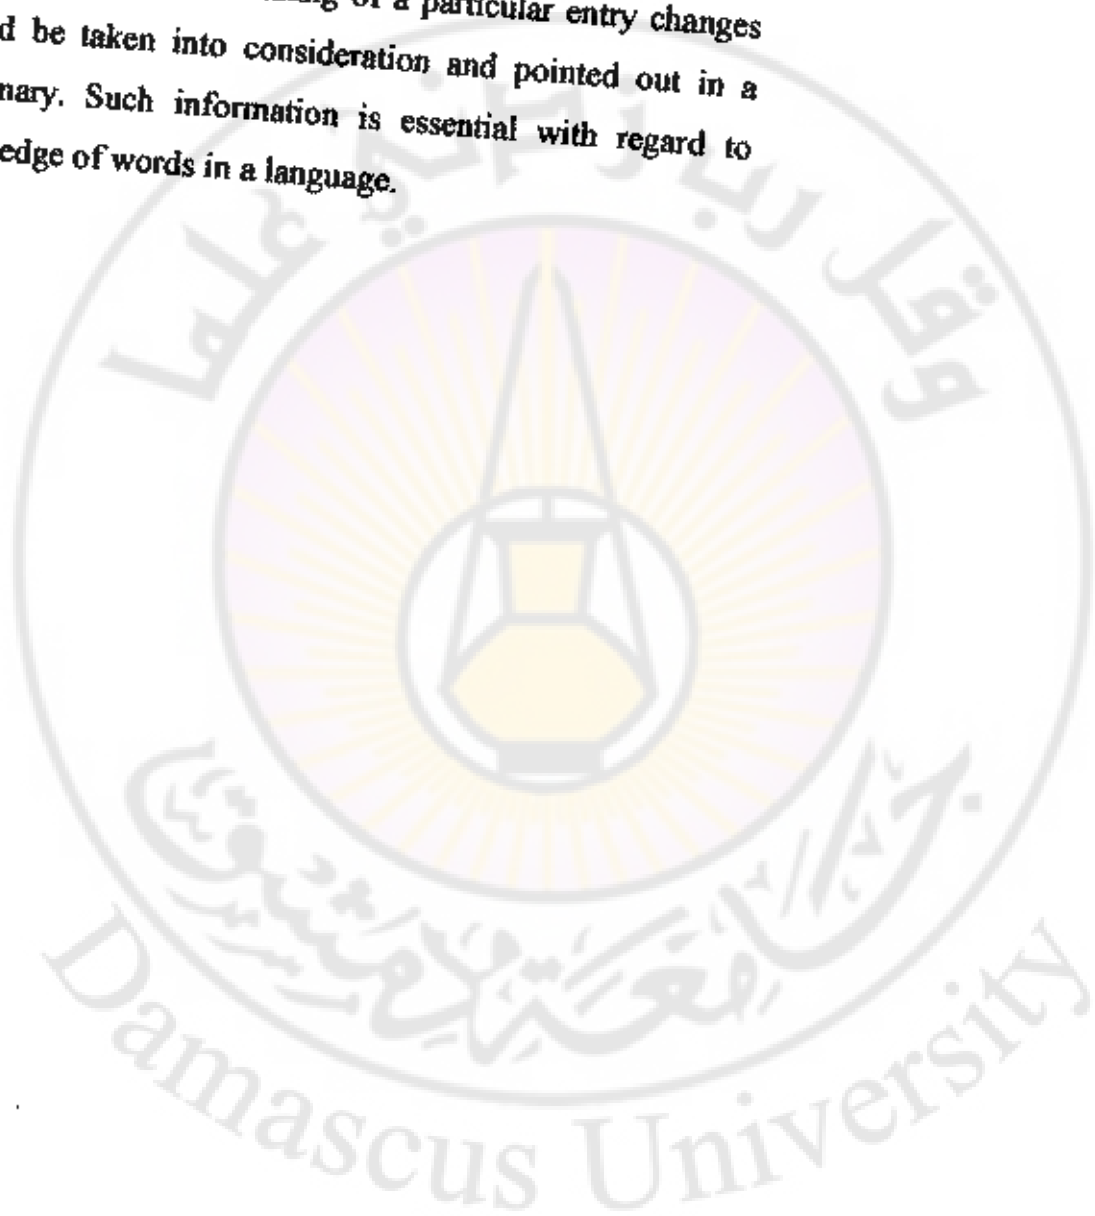

Prefixes can also be classified as derivational morphemes:

- | | |
|------------|---------------|
| Ambitious | unambitious |
| Determines | predetermines |

(see the chapter on word formation processes).

In the above two examples the part of speech classification has not changed. However, the meaning has changed in a significant way. In contrast, the addition of -ness to happy or -tion to hesitate, although has changed the part of speech classification, it has little effect on the meanings of the words they are attached to.

What happens to words regarding inflection and derivation especially when the meaning of a particular entry changes should be taken into consideration and pointed out in a dictionary. Such information is essential with regard to knowledge of words in a language.

4. Semantic information

The main concern of a dictionary is to supply the semantic information about words. This information is of two types: word properties and word relations. Properties have to do with the sense, reference or use of a particular entry, through a process of explaining, defining or exemplifying. Word relations and word meanings can be stated in terms of their association with each other.

Properties:

The head of a native speaker of a particular language is filled with words and their meanings. The knowledge of the meanings of words permits a native speaker to use words appropriately in sentences and to understand them when heard without stopping and asking oneself what a certain word like "mean" means.

In general, a word will have at least one special semantic "defining" property. The word "mare" for example has all the semantic properties of "horse" [horseness, four-legged, an animal and so on] + the meaning [female]. Some semantic properties are common to many words; [female as a scientific property or feature is not just a part of the meaning of [mare] but of "doe", "ewe", "vixen", "woman", "bitch", "girl", "maiden", "witch", "spinster" and so on. Some of the mentioned words have the semantic feature or property [human] along with words like "boy", "man", "professor", "waiter" etc. The latter words have the feature [male]. All the examples mentioned so far have the feature or semantic property [animate]. Words like "freedom", "rock", "book", "street", "tree" do not have such a feature.

Not only nouns have semantic features but verbs as well. Verbs like "beautify", "kill", "lengthen", have the semantic feature "cause".

Semantic properties are not independent of each other. Certain pairs of semantic properties are mutually exclusive. If the word has the feature [male], it is automatically not female. The same thing can be said about [abstract] and [concrete]. Some semantic properties are predictable given the presence of other semantic properties. For instance, if a word has the feature [human], it is predictably and automatically [animate]; it is redundant to add to it the latter feature.

B. Relations

The meanings of words can also be seen through an understanding of their relations to each other.

(1) homonymy and polysemy:

When different words are pronounced the same but have different meanings, we have a case of homonymy. A word like "bear" refers to an animal and it also means "to tolerate"

The case of polysemy is even more complicated; the literal meaning of a word like "eat" in a dictionary is "taking food", other meanings for such a term may be provided: "use up", "corrode", i.e. three different meanings. We can also distinguish between "eating soup" and "eating meat". We can also talk about "drinking soup" as well as eating it. In one of its senses, then, "eat" corresponds to "drink".

A word like "flight" is treated by a dictionary as a single polysemic word with at least five homonyms each with a different meaning.

Flight:

- Passing through the air

- Power of flying
- Air journey
- Unit of the air force
- Volley
- Digression
- Series of steps.

A dictionary-maker has to decide to treat terms like "flight", "lead", "bank", "bear" each as one entry with many meanings or as separate entries. There are also cases under this heading where we have two words with the same pronunciation, different spellings and different meanings; (sight, site), (sun, son), (ate, eight), (night, knight)

Even we may find three or four words in certain cases; (rite, write, right).

Bear: "an animal", and Bear: "to tolerate" are considered homophonic and homographic homonyms but sight and site are just homonyms.

Finally, a word which is polysemic will naturally have a variety of synonyms each corresponding to one of its

meanings. It will often have a set of antonyms. A word like “fair” would be used with hair, skin, weather, sky, and judgment. The antonyms would be dark hair, dark skin, foul weather, cloudy sky, and unfair judgment.

2. Hyponymy

Such a relationship among words refers to the principle of INCLUSION. It is a matter of class membership. The term (animal), for example, includes “elephant”, “hyena”, “cow”, “lion”, etc. The term (craftsman) includes or covers a variety of professions; under such a heading one may include (colour terms) and (kinship terms).

[See the chapter on the Semantic Domains]

(3) Synonymy

This is a relationship of sameness or similarity in meaning. Although dictionaries seldom rely on synonymy but on descriptive explanatory and defining details the synonymy semantic relations among words are essential for understanding word meaning when it is available.

It is well known that English is a hybrid language. That made it rich in synonyms for certain historical reasons related to the impact other languages had on it. At different historical eras there was a huge influx of Greek, Latin, and French vocabulary into English. For such reasons sometimes you find not only two but three or four words referring to the same thing. Look at these pairs of words:

- | | |
|-------------|-----------|
| - Brotherly | fraternal |
| - buy | purchase |
| - world | universe |
| - wide | broad |

Sometimes there are triples:

Kingly, royal, regal

It is said, however, that there are no perfect synonyms in a language. There are many ways in which synonyms might differ:

- some sets of synonyms belong to different dialects of a language:

fall : American English

Autumn: British English.

Elevator: American English

Lift: British English

*One can find hundreds of examples like this [see Bilingual Dictionaries Chapter]

*[try to find examples from Arabic]

- Variation because of stylistic reasons

"gentleman" and "chap"

"pass away", "die", "kick the bucket" and "pop off"

- Words may differ in their emotive or evaluative meanings:

"politician"

"statesman"

"hide"

"conceal"

"liberty"

"freedom"

Each implying approval or disapproval.

- Some words are collocationally restricted

Two words may be perfect synonyms except for the company they keep: We can say "deep well" but not "profound well"

- Many words are close in meaning i.e. their meanings overlap. In them there is a loose sense of synonymy. This is the kind of synonymy exploited by dictionary makers.

The possible synonyms for a word like (mature) are "adult", "ripe", "perfect" and "due"

The possible synonyms for a word like (govern) are "direct", "control", "determine", and "require".

"loose" would even have a larger set:

"inexact", "free", "relaxed", "vague", "lax", "unbound", "inattentive".

If each of the possible synonyms given is to be checked, we will have a further set for each getting further and further away from the meaning of the original word.

Dictionaries, except large professional ones, tell us little about the precise connections between words and their defining synonyms or between/ among synonyms themselves.

4. Antonyms:

The term refers to oppositeness of meaning. It is a regular and natural feature of language. Dictionaries, however, do not give a proper place for antonyms. They are of different types:

- grading, as in age and size

(big x small) → bigger x smaller

(old x young) → older x younger

- complementary, this deals with incompatible terms:

male x female

married x single

dead x alive

Some pairs of antonyms are not symmetrically reversible.

The more and less relationship does not apply to them.

“stupid” is an antonym of “brilliant” but “less stupid” does not mean “brilliant”

→ Relational opposites

These are words like

Buy x sell

Lend x borrow

Give x receive

Husband x wife

Parent x child

Debtor x creditor

Among special opposites, one may mention:

Above x below

Come x go

Kinship terms can be considered also under the umbrella of relational opposites:

Father x mother

Son x daughter

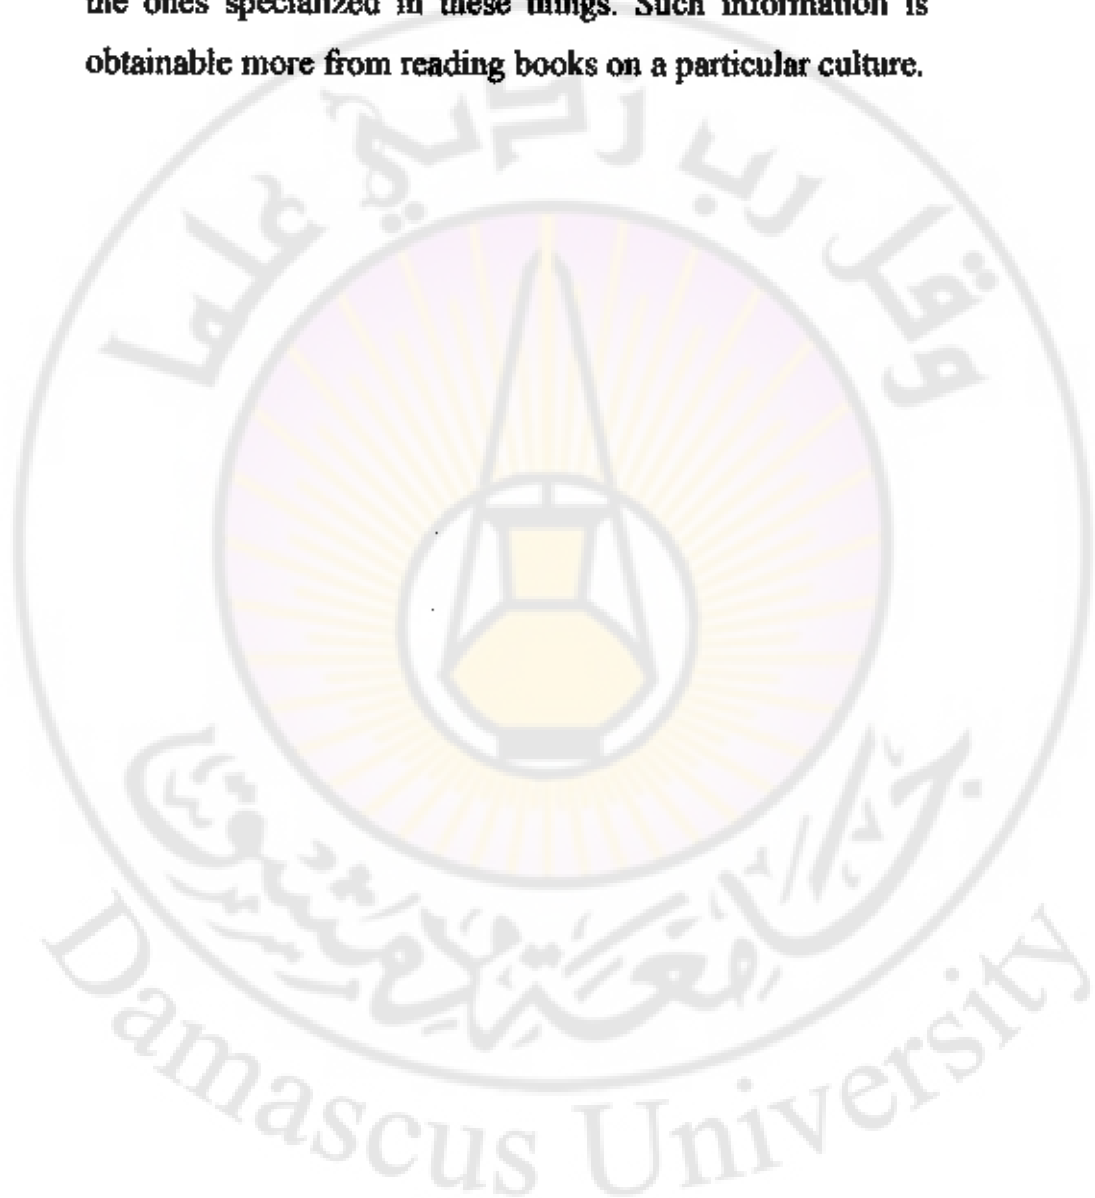

Uncle x aunt

Brother x sister

Learning a word by a dictionary user involves learning the set of relationships into which it enters with other words in the language such as the relations mentioned above.

Finally, dictionaries provide a user basically with phonological, morphological syntactic and semantic information. Stylistic cultural and historical information about words is rarely obtainable from ordinary dictionaries.

Dictionaries solely based on use and the use of language are the ones specialized in these things. Such information is obtainable more from reading books on a particular culture.

Chapter Three

Word Formation processes

Since English is the language of this book and from which and into which translation-in our case - takes place, it is worth knowing that this language is a hybrid language. Almost all world languages contributed to the make up of its bank of vocabulary.

The English words of Anglo-Saxon origin do not constitute more than twenty to thirty percent of today's English. The rest are borrowed from other languages. Borrowed words are not the concern of this section. What is of concern here is a specific process of word formation in English, namely affixation.

This process of word formation does not just involve adding a suffix to an already existing word so that a noun, an adjective, a verb or an adverb is derived. English borrowed and used suffixes and bases from both Latin and Greek to generate tens of thousands of words that constitute over fifty percent of English word today.

Following is a list of the suffixes from Latin origin together with the meaning they give to the term they are attached to :

- ((-able, -ible, -ile)) “be able to” or able to be
- ((-acious, -id, -itious, -ive, -ory, -ulous, -vous)) “tending to”
- ((-ory, -orium)) “place for”
- ((-acity)) “quality of being inclined to”
- ((-acy)) “quality of being or having”
- ((-(u)lence, -(o)lence)) “state or quality of being full of”
- ((-ial, -eal, -ane, -an, -ar, -ary, -ic, -tic, -ile, -il, -ine)) “pertaining to”
- ((-ance, -ancy, -ence, -ency, -itude, -ity, -ety, -ty, -(i)mony, -y)) “quality of....”
- ((-ate)) “possessing”
- ((-cule, -cle, -el, -il, -ole, -ule, -le)) “little”
- ((-esce)) “to begin”
- ((-(i)fic, -fy, -igate, -egate)) “making, to make”

- ((-ion)) "act of"
- ((-men, -ment)) "result of"
- ((-or)) "one who does"
- ((-or,(our))) "state of"
- ((-ose, -iose, -eous, -ous)) "full of"

- **Exercise**

Find word that end with such suffixes and translate them into Arabic.

You will not only find a real difference sometimes between the root or base term and the derived term by the suffix, but most of the time you might need more than one word to give the meaning of the derived term .

If you dig down deep into Arabic, you will definitely find one term for each entry.

Now if we look at the list of bases English got from Latin, we will realize how much Latin had influence on English vocabulary wise. Each one of the following bases has tens or hundreds of elements attached to it so that words had been generated .

The bases from Latin are listed along with the basic meaning of each base:

acr-, ac(u)	: sharp
ag-, ig-, act-	: to do, to drive
am-	:to love
anim-	:mind, feeling, life
ann(u)-, enni-	:year
aqu(a)-	:water
art-	:art, skill
aud-, audit-	:to hear
bell-	:war
bene-	:well, good
Benign-	:kind
bi-, bin-	:two, twice
cad-, cid-, cas-	:to fall, to befall
calc-	:limestone

cap-, cip-, capt-, cept-, ceiv-	:to take, to seize
capit-, cipit-,	:head
car-,	:flesh
ced-, cess-	:to go, to yield
celer-	:swift
cent-	:hundred
cern-, cret-	:to separate, to distinguish
cid-, cis-	:to kill, to cut
clud-, clus, clos-	:to shut
cord-	:heart
corpor-, corp, corpus-	:body
cre-, cresc-, cret-	:to grow
cred-, credit	:to believe
cruc-	:across
culp-	:blame, fault
cumb-, cub-	:to lie down
cur(r)-, curs-, cours-	:to run, to go
de-, div-	:a god
deci, decim-	:tenth
dic-, dict-	:to say
doc-, doct-	:to teach
du-	:two

duc-, duct-	:to lead
equi-	:equal
err-	:to wander
fa-, fat-	:to speak
fac-, (fic-), fact-, fect-	:to do, to make
fall-, fals-	:to deceive
fer-	:to bear, to carry
fid-	:faith
fin-	:end, limit
firm-	:firm, strong
flect-, flex-	:to bend
flor-	:flower
flu-, flux-	:to flow
fortit-	:strong
frang-, fring-, fract-	:to break
fund-, fus-	:to pour, to melt
gen-, genit-	:to produce, to give birth to
gener-, gen-	:race, kind
ger-, gest-	:to carry, to produce
grad, gress-	:to step, to go
grand-	:great
grat-	:pleasing, grateful

grav-	:heavy
greg-	:flock, herd
her-, hes-	:to stick
i-, it-	:to go
jac-, ject-	:to throw
join-, junct-	:to join
judic-	:judgment
jur-	:to swear
lat-	:to bear, to carry
later-	:side
leg-, lig-, lect-	:to choose, to pick out, to read
lev-	:light
line-	:line
liter-	:letter, literature
loc-	:place
loqu-, locut-	:to speak
luc-	:light, to shine
lud-, lus-	:to play, to mock
lumin-	:light
magn-	:great
mal(E)-, malign-	:bad
man(u)-	:hand

matr-, matern-	:mother
medi-	:middle
milit-	:soldier
mill-	:thousand
minor-, minus, minut-	:small, smaller
misc-	:to mix
mit-	:mild, soft
mit(t)-, mis(s)-	:to send, to let go
moll-	:mild, soft
mon-, monit-	:to warn, to advise
mort-	:death
mov-, mot-	:to move
mult-	:many
mut-	:to change
nasc-, nat-	:to be born
neg-	:to deny
nomen-, nomin-	:name, noun
nul(l) -	:nothing
nunci-(-nounce)	:to announce
oct-	:eight
octav-	:eighth
omn-	:all

ordin-	:order
part-	:part
patern, patr-	:father
pati-, pass-	:to endure, to suffer
ped-	:foot
pel-, puls-	:to drive, to push
pend-, pens-	:to hang, to weigh, to pay
pet-, petit-	:to seek
plac-	:to please, to appease
ple-, plet-	:to fill
plen-	:full
plic-, plicit, plex-, ply-	:to fold, to interweave
pon-, posit-, (pound-), (pose)	:to place, to put
port-	:to carry
pot-	:to have power
press-	:to press
prim-	:first
propri-	:one's own, fitting
quadr(u) -	:four
quart-	:fourth
quint-	:fifth
quir-, quist-, quest-	:to ask, to seek

radic-	:root
rect-	:right, straight
rect-, reg-, rig-	:to straighten, to rule
rog-	:to ask
rupt-	:to break
sac-	:sacred
sanct-	:holy
sati(s) -	:enough
sci-	:to know
scrib-, script-	:to write
sec-, (seg-), sect-	:to cut
sed-, sid-, sess-	:to sit, to settle
semi-	:half, partly
sen-	:old
sens-, sent-	:to feel, to think
sept-, septem-	:seven
sequ-, secut-	:to follow
serv-	:to serve, to save
sext-	:sixth, six
simil-, simul-	:like
sol-	:alone
solv, solut-	:to loosen, to free

son-	:sound
spec-, spic-,	:to look
spir-	:to breath
st(A)-, slat-	:to stand
string-, strict-, strain-	:to draw tight
stru-, struct-	:to build
tang-, ting-, tact-	:to touch
tempor-	:time
ten-, tin-, tent-, tain-	:to hold
tend-, tens-, tent-	:to stretch, to strive
tenu-	:thin
termin-	:boundary, end
tract-	:to drag, to draw
tri-	:three
trit-	:to rub, to wear
un-	:one
und-, (ound-)	:wave
val-, vail-	:to be strong
ven-, vent-	:to come
ver-	:true
verb-	:word, verb
vest-, vers-	:to turn

vest-	:garment
vi-	:way, road
vinc-, vict-	:to conquer
vir-	:poison
viv-	:to live
voc-	:voice, to call
vol-	:to wish
volv-, volut-	:to roll
vor-	:to devour
vulg-	:common

Next there are lists of suffixes and bases of Greek origin.

If they are put together with the Latin bases and affixes, one would understand the huge influx of Greek and Latin terms into the English vocabulary which constitutes as we said earlier over fifty percent of the total English bank of vocabulary

That is to say a Latin suffix could be attached to a Greek base and vice versa and the result would be a huge number of words.

Make such combinations and see what words you may come up with. Then translate these words into Arabic.

List of suffixes and combining forms (Greek)

Suffix	meaning
• (-al, -an, -ian, -ic, -ac, -tic)	:pertaining to, like
having the character of,	
concerned with	
• (-arch)	:one who rules
• (-archy, -cracy)	:rule by

- (-arium, -arion :little
- (-ast, st :one who does
- (-crat :one who advocates rule by
- (-ectomy :surgical removal of
- (-emia :condition of the blood
- (-gram :thing written
- (-graph, graphy :writing
- (-iasis :diseased condition
- (-ician :specialist in
- (-ics, -tics :art, science, study of
- (-idium, -ion, -ium, -isk, -iscus :little
- (-in, -ine :chemical substance
- (-ism :belief in
- (-ist :one who believes in
- (-ite :one connected with
- (-logy, -nomy :science of
- (-ma, -m, -me :result of
- (-mania :madness about
- (-meter :measure
- (-metry :science of measuring
- (-oma :tumor

- (-osis :diseased condition of
- (-ous, ious :full of, pertaining to, like
- (-pathy :disease of
- (-phobe :one who fears or hates
- (-phobia :abnormal fear of
- (-scope :instrument for viewing
- (-sis, -se, -sia, -sy :act of
- (-t, -te :he who
- (-therapy :treatment of
- (-tomy :surgical operation on
- (-y, -ia :quality of

List of bases (Greek)

Base	meaning	Example
acou- acu "parcusia"	to hear.	"acoustic",
acr-	highest	"acrobat"
actin-	ray, radiating, structure	actinobiology
aden-	gland	adenoid
aesthe-, esthe-	to feel, to perceive	anesthetic
agon-	struggle, contest	protagonist
alg-	pain	neuralgia
all-	other	parallel
andr-	man, male	androgenous
angle-	messenger, message	angelic
anthrop-	human being, man	anthropology
archa(e)-	ancient	archaeology
aut-	self	automatic,
automobile		
bar-	weight, pressure	barometer
bi-	life	biology, biography
brady-	slow	bradycardia
cac-	bad	cacogenics
cal(l)-, kal(l)	beauty	calisthenics

canon-	a rule	
cardi-	heart	cardiology
cau-, caus-	to burn	cauterize
centr-	center	
cephal	head	mesocephalic
chir-, cheir	hand	chiropractor
chlor-	green, chlorine	chlorophyll
chore-	dance	chorus
chron-	time	chronic, chronicles
cla-	to break	iconoclast
clys-	to wash	
cosm-	universe, order	cosmic, cosmetic
cra-	to mix	
cri-	to judge, to decide	criterion, criticism
cycl-	circle, wheel	cyclic
Dec(A)	ten	decaliter
derm-, dermat-	skin	dermatologist
deuter-	second	
di-	twice	
didactic	to teach	didactic
do-	to give	dose
dox-, dog-	opinion, teaching	dogma, orthodox

dyn-, dynam-	force, power	dynasty,
dynamic		
enter-	intestine	dysentery,
archenterons		
er-, erot-	love	erotic
erg-, urg-	work	energy
ethn-	race	ethnography
gram-	marriage	polygamy
gastr	stomach	gastric
ge-	earth	geography
gen(e)-, gon-	to be produced	
hydrogen		
	to originate	genesis
gen(e)-	kind, race	genocide,
geneology		
ger-, geront-	old age, old people	gerontocracy
gloss-	tongue	glossary
gno-	to know	agnostic, diagnosis
gyn(e)	woman, female	gynarchy,
gynecology		
hect-	a hundred	hectometer
hegemon-	leader	hegemony

heli-	sun	helium
hem-	blood	hemotecrete,
hemoglobin		
hemi-	half	hemisphere

The rest of the bases will be just cited and students or readers are advised to provide examples and translate them into Arabic.

hepat-	liver
hept-	seven
heter-	other, different
hex-	six
hipp-	horse
hol-	whole
hom-	same
hydr-	water
hygr-	wet
iatr-	physician, medicine
icon-	image
ide-	idea, thought
idi-	one's own, peculiar
is-	equal

kilo-	one thousand
lab-, lep-	to take, to seize
lat(e)r-	to worship
leuc-, leuk	white
lip-	fat
lith-, lite	stone
log-, logue	speech, word
log(ue, lect	to speak, to choose
marc-	large
man-, mant	to divide by means of
mast-, maz-	breast
mega-, megal-	large, a million
melan-	black, dark
mer-	part
mes-	middle
micr-	small
mim-	to imitate
mis-	hatred
mon-	one
morph-	form, shape
naut-	sailor
ne-	new

necr	the dead
nes-	island
neur-	nerve
oct(a)-	eight
od-	song, poem
od-, hod-	way, road
olig-	few
oo-	egg
op-, opt	eye, to see
ora-	to see
orth-	straight, correct
ot-	ear
pan-, pant-	all, every
path-	to feel, to suffer, disease
part-	family, father, clan
ped-	child
pent-	five
pha-	to show, to appear
phag-	to eat
phil-	to love
phon-	sound, voice
phot-	light

phra-	to speak
phy-	to grow
physi-	nature
phyll-	leaf
plas(t)	to form
pleg-	paralysis
pod-	foot
pot-	city, state
polem-	war
poly-	many, much
prot-	first, original, primitive
pseud-	false
psych-	mind
pyr-	fine
rhin-	nose
schiz-, schis-	to split
som-, somat-	body
sta-	to stand, to stop
soph-	wise
stere-	solid
stol-, stal-, stle-	to send, to draw
stom-, stomat-	mouth

tachy-	swift
tach-	speed
tact-, tax-	to arrange, to put in order
taph-	tomb
techn-	art, skill, craft
tele-	afar, operation at distance
tetr (a)-	four
the-	to place
the-	god
therm-	heat
tom-	to cut
top-	place
tox-	poison
tri-	three
trop-	to turn
ur-	urine
ur-	tail
xen-	stranger, foreigner
zo-	animal

Combining bases and affixes in Latin and Greek will result in a huge number of English words in frequent use in all fields especially academic ones, sciences, humanities and others.

When a translator masters these combinations, a great deal of the English vocabulary becomes part of his repertoire.

There are affixes of Anglo- Saxon Origin. If these are added to the ones from Latin and Greek, word formation processes through affixation becomes somehow comprehensive. Other word formation processes include:

- al (makes abstract nouns from verbs) burial, denial, rehearsal
- dom (makes abstract nouns from adjectives and nouns) freedom, wisdom, martyrdom
- ed (makes adjectives from nouns) bearded, interested, privileged
- en1 (makes verbs from adjectives and nouns) broaden, threaten
- en2 (makes adjectives from nouns of material) golden, wooden

- en3 (makes participles of certain verbs used as adjectives) drunken, mistaken
- er (makes nouns of agent or instrument from certain verbs \ nouns meaning inhabitant from certain nouns and adjectives) announcer, islander, New Yorker, Londoner, Eastender, bus-driver
- ess (makes feminine nouns from other nouns) actress, governess
- ful1 (makes nouns of measurements from other nouns) armful, handful, mouthful
- ful2 (makes adjectives from nouns and verbs) cheerful, graceful, mournful
- hood (makes abstract nouns from nouns and adjectives) childhood, falsehood, motherhood
- ing (makes adjectives and nouns from various sources) absorbing, gathering, opening
- ish (makes adjectives from various sources) devilish, yellowish, five-o'clockish, book warmish
- less (makes adjectives, mostly from nouns) bottomless, penniless, hopeless

- ly1 (makes adjectives mostly from nouns) friendly, weekly, cowardly,
- ly2 (makes adverbs from adjectives) completely, similarly,
- ness (makes abstract nouns from adjectives) consciousness, exactness, thoroughness
- ship (makes abstract nouns from adjectives and nouns) censorship, scholarship
- some (makes adjectives from various sources) quarrelsome, burdensome
- wise (makes adverbs from nouns) clockwise, businesswise, translationwise
- y1 (makes adjectives mostly from nouns) hungry, silky
- y2 (makes nouns mostly from other nouns) ministry, smithy
- y3 (alternating in spelling with i.e., it forms diminutives) cookie, dolly, kitty, mommy
- ic (make adjectives some of which are also nouns) academic, automatic, dynamic
- ics (in nouns which indicate field of study) acoustics, linguistics, economics

- ify, efy (in a large class of verbs) amplify, exemplify, liquefy
- ion (in thousands of abstract nouns) adoption, communion, intention
- ish (in a small number of verbs) impoverish, extinguish, vanish
- itude (in certain abstract nouns) longitude, solicitude
- ity (in a large number of abstract nouns) absurdity, complexity, notoriety.
- mostly from French
- aire (nouns and adjectives from other sources) millionaire, doctrinaire
- ee (makes nouns from adjectives, nouns and verbs) absentee, nominee, refugee, employee
- eer, ier (makes nouns which indicate persons) auctioneer, engineer
- ese (makes nouns and adjectives of nationality) Japanese, Vietnamese, Sudanese
- eur, euse (makes nouns designating people) chauffeur, masseuse

- ique (in a few nouns and adjectives) antique, critique, physique, technique, unique

- oon (in noun) baboon, cartoon

If a translator is equipped with such a knowledge about words, the use of the dictionary decreases noticeability; that would be effort and time saving for a translator.

Chapter Four

Dictionaries and the Semantic Domains

The basic task of a dictionary whether it is a mono- or bilingual is to give the meanings of words and register all possible items related to them semantically. There are dictionaries specialized in listing all the possible synonyms of a word or all the words that belong to a particular semantic field.

Such a dictionary is called Thesaurus after the name of the first person who compiled it. Others worked on such dictionaries and kept the name of Thesaurus in honour of that man.

A thesaurus can be small or large in size. The one from which examples will be taken in this book is the revised and expanded *MARCH'S THESAURUS and DICTIONARY of the English Language*. It is over than thirteen hundred pages compiled under the editorial supervision of Norman Cousins, 1980.

This thesaurus or dictionary takes an entry like "Border" and lists all its possible meanings: brim, brink, brow, edge, margin, rim, skirt and verge. All the above items belong to the same part of speech the first entry belongs to i.e. they are all nouns.

The thesaurus then lists the meanings of the entry when it is an adjective: (labial) "having edges or lips", (labiated) "provided with edges or lips", (marginal) "pertaining to the margin", (marginated) and (skirting). It also gives the denotative meanings of the term: "(chaps or chops)" which is "the fleshy parts about the jaws". (coast) "the land bordering upon the ocean" along with terms like: (frame), (frill), (fringe), (portal), (trimming) or (valence).

If one looks into another entry in the thesaurus like "Bravery", one will find it associated with its antonym "cowardice". The two terms are treated as headings with all possible meanings and words related to them are listed. Under "Bravery" we may read related words with their meanings:

Audacity: excessive tendency to venture.

Backbone: firmness

Boldness: readiness to meet danger

Chivalry: conduct becoming a knight.

Confidence: trust in oneself or another

Daring: eagerness to encounter danger

Gallantry: spirited and adventurous courage with gaiety.

The list goes on to state words like heroism, intrepidity, manhood, nerve, pluck, prowess (which is bravery combined with skill) resoluteness, spirit, valor, and virtue.

With regard to the antonym (cowardice), the thesaurus lists almost a similar number of entries with their meanings:

Baseness: dishonorableness

Fear: feeling aroused by the expectation of danger

Funk: cowardly fright

Poltroonery: mean-spirited cowardliness

Timidity: disposition of being afraid of offending others

Thesaurus also lists the denotations of the term “cowardice”; among them we read:

Alarmist, costrel, dastard, pessimist, recreant, sneak. In addition to that the figurative use of the term can be listed

which is part of the slang language: “white-liver” means coward.

If we take another entry like “law”, we find that it is associated with its antonym “lawless”. The thesaurus first lists all the possible meanings of the term with an explanation of each like: (charter), (code), (decree), (enactment), (equity), (form), (formula), (institution), (legality), (legitimacy), (ordinance), (regulation), (statute). The nouns associated with the entry “law” are then listed along with their meanings: (arm of the law), (codification), (jurisprudence), (legislation).

Then we find a list of adjectives pertaining to the entry: (according to law), (chartered), (Constitutional), (Law-abiding), (lawful), (legal), (legislative).

As for the antonym, the thesaurus lists all the possible terms that are within the semantic domain of “lawlessness”: (antinomy), (arbitrariness), (breach of law), (brute force), (club law), (drumhead law), (illegality), (lawbreaker),

marshal law), mob law), (outlawry), (poaching), (violation of law).

We could also read a list of adjectives pertaining to the same semantic domain of lawlessness:

(a dead letter), (contraband), (despotic), (extra judicial), (illegitimate), (in-judicial), null and void), (prohibited), (unaccountable), (unwarrantable), (unwarranted)

This thesaurus, unlike other editions, is accompanied by a dictionary.

Whatever entry that does not occur under any of the registered headings is included.

Immediately after the two entries "law" and "lawlessness", we notice a mention of terms like: (law-abiding), (law-breaker), (law-giver), (law-maker), (law-monger),. With that there would be a comprehensive treatment of any entry that may be encountered by a translator or a reader.

Exercise

Following are pages from March's thesaurus; try to find the meanings in Arabic of each of the entries included:
"HEART", "HEAT" "COLD"

HEARING—Years—Continued.

lft. To hear; listen.
listen. To pay close attention; to hearken.
listen with both ears. To listen intently; sharply.
listen to the ear. To be heard.

Acoustic. Pertaining to the sense of hearing.
Auditory. Relating to hearing.

Acoustic window [L.]. With pricked up ears, with attentive ears.

Earl bark yet hear! Retal! Ocul! eyes! A call commanding attention to a proclamation.

hear-say. Common talk. TIMIDITY—MYSTERY.
hearse. A vehicle for carrying the dead to the grave.

CONVULSION—VIBRA.
heart. Courage; love; the essential or vital part of anything; the seat of the affections and passions. AFFECTION, AMATORY, BRAVERY—COURAGE, CANTOR, CONSEQUENCE—INDEPENDENCE, LOVE—HATE, MIND—INSECURITY, OUTRAGE—INJURY, READINESS—RELUCTANCE, SENSITIVENESS—OBJECTIVENESS; at heart, AFFECTION, EMOTION; beating heart, EMOTION, EXCITATION; break the heart, PLEASURABLENESS—PAINFULNESS; by heart, SKETCH—MAN—FURNITURE; do one's heart good, AFFECTION, PLEASURABLENESS—PAINFULNESS; from bottom of heart, TRUTHFULNESS—FALSHOOD; go to one's heart, EXCITATION; have a place in the heart, LOVE—HATE; heart and good, AFFECTION, DETERMINATION—VACILLATION, EMOTION, ENTIRETY—DEVOTION, READINESS—RELUCTANCE, TON—RELAXATION; heart meaning for, COMPARISON—RUTHLESSNESS; heart expanding, EMOTION; heart falling one, LIGHTHEARTEDNESS—DEJECTION, SANGUINENESS—TIMIDITY; heart in hand, READINESS—RELUCTANCE; heart in the right place, CHARITABLENESS—MALICE; heart leaping into one's mouth, EXCITATION; heart leaping with joy, JUBILATION—LAMENTATION, PLEASURE—PAIN; heart of gold, SANGUINENESS—HOPEFULNESS; heart of heart, PLEASURABLENESS—PAINFULNESS; heart of oak, BRAVERY—COURAGE, HARDNESS—SOFTNESS, STRENGTH—WEAKNESS; heart of stone, EXCITATION, FAVORITE—ODIOUSNESS; heart's core, AFFECTION, MIND—INSECURITY; heart sinking, SANGUINENESS—TIMIDITY; heart swelling, EMOTION, EXCITATION; in good heart, SANGUINENESS—HOPEFULNESS; know by heart, KNOWLEDGE—FORAGE, REMEMBRANCE—FORGETFULNESS; lay to heart, LIGHTHEARTEDNESS—DEJECTION; learn by heart, SPOCAVION—MISTAKING; lift up the heart, DEVOTION—IDOLTRY; lose one's heart, LOVE—HATE; man after one's own heart, AMITY—HOSTILITY; nearest to one's heart, LOVE—HATE; not find it in one's heart, READINESS—RELUCTANCE; put one's heart into, DETERMINATION—VACILLATION; set one's heart upon, DESIRE—DISDAIN, DETERMINATION—VACILLATION; take heart, BRAVERY—COURAGE, CONTENTEDNESS—DISCONTENTMENT, SANGUINENESS—HOPEFULNESS; take to heart, CONTENTEDNESS—DISCONTENTMENT, FAVORITE—ANGER, LIGHTHEARTEDNESS—DEJECTION, SENSITIVENESS—APATHY; to one's heart's content, CONTENTEDNESS—DISCONTENTMENT, ENOUGH, READINESS—RELUCTANCE; with heart, SENSITIVENESS; wind around the heart, LOVE—HATE; with a heavy heart, READINESS—RELUCTANCE; with all one's heart, READINESS—RELUCTANCE.

heart-sick. Mental anguish. PLEASURE—PAIN

HEAT—COLD.

Adipose heat. Great heat, like that in Africa.
Normal heat. Great heat, like that in Europe.
Subnormal. Heat equal to the temperature of human blood, or about 98°.
Caloric. Heat; degree of warmth.

Overheat. To heat more than intended for the house.
Pick up one's heat. To endeavor to heat.
Reach the heat. To be heard.
Ring in the ears, etc. To torment, etc. See REMOVED.

HEATING—Affection.

Heating. Aerial; pertaining to the air, heating, etc. Pertaining to the sense of hearing. See HEAR.

HEATING—Adjective.

Heating. Through the air; by heating.

HEATING—Noun.

Heating. A proclamation.

heart-break'-ing. Extremely distressing. EMOTION, PLEASURABLENESS—PAINFULNESS.
heart'-break'-ed. Deeply affected. PLEASURE—PAIN.
heart'-burn'-ing. Discontent; secret enmity. AMITY—HOSTILITY, CONTENTEDNESS—DISCONTENTMENT, CONTENTEDNESS—RESENT, FAVORITE—ANGER.
heart'-for'-get'-ing. Affecting by injurious influences. PLEASURABLENESS—PAINFULNESS.
heart'-felt. Very sincere. EMOTION, PLEASURABLENESS—PAINFULNESS.
heart'-for'-get'-ing. Praying on the feelings. PLEASURABLENESS—PAINFULNESS.
heart's. A fireplace; the home. DWELLER—HABITATION, OPEN—REPROBATION.
heart'-stone. A stone laid to form a hearth. DWELLER—HABITATION.
heart'-ily. With the whole heart. EMOTION.
heart'-s-horn. Cordiality. EMOTION, SOCIABILITY—PRIVACY.
heart'-less. Destitute of sympathy; pitiless. SENSITIVENESS—APATHY, VIRTUE—VICE.
heart'-quak'-ing. Nervousness from fear. SANGUINENESS—TIMIDITY.
heart'-suck'-ing. Very distressing. PLEASURABLENESS—PAINFULNESS.
heart's'-ease. The palsy. CONTENTEDNESS—DISCONTENTMENT.
heart'-shaped. Like the heart in shape. CONVULSION—RECTILINEARITY.
heart'-sick. Sick of; deeply grieved. DESIRE—DISDAIN, DESIRE—RELAXATION.
heart'-sick'-ening. Causing deep grief. PLEASURABLENESS—PAINFULNESS.
heart'-sick'-ing. Depression of mind. SANGUINENESS—TIMIDITY.
heart'-some. Merry. SANGUINENESS—TIMIDITY.
heart'-suck'-ed. Overwhelmed with grief. PLEASURE—PAIN.
heart'-strings, tear the. To lacerate the feelings. PLEASURABLENESS—PAINFULNESS.
heart'-swell'-ing. Causing the heart to swell. FAVORITE—ANGER.
heart'-wound'-ing. Affecting the feelings. PLEASURABLENESS—PAINFULNESS.
heart'-y. Cordial; full of health. AMITY—HOSTILITY, EMOTION, HEALTH—SICKNESS, LIGHTHEARTEDNESS—DEJECTION, READINESS—RELUCTANCE; hearty laugh, JUBILATION—LAMENTATION; hearty meal, NOBILITY—EXCRETION; hearty reception, SOCIABILITY—PRIVACY.
heat. A form of energy conducted by a rise of temperature; a single course of a race; excitement; to make hot. EXCITATION, EXCITABILITY—INERTIBILITY, HEAT—COLD, HEATING—COOLING, STRENGTH—FRAGILITY; dead heat, EQUALITY—INEQUALITY; heat of passion, FAVORITE—ANGER.

Other dictionaries however follow in the footsteps of a thesaurus but in a modern way by arranging their entries in a more organized and effective way that could help a reader or a translator a great deal in understanding meaning very well. A case in point is a Longman dictionary called *Essential Activator*.

If the thesaurus dictionary highlights the semantic relations and properties of words in terms of synonymy and antonymy, this dictionary goes into more semantic and grammatical properties of words.

If we take an entry like “Angry” copied in the next pages, we notice that the dictionary has stated the following facts about such a term:

1. It directs the user to go to the entry “calm” if what is intended is the opposite of “angry”. And with that the dictionary expressed an antonymy relationship of the entry at hand with other terms. And this is a genuinely helpful cross referencing which can be found in all entries throughout the dictionary.

2. It implements language use as the major driving force behind investigating the registered entries in the dictionary.

The entries usages are divided into seven and each is supported by natural corpus-based examples that give the appropriate context of use:

Feeling angry

First an explanation of such usage is given

Second it is supported by an example

“I was so angry that I could hardly speak”

Third the different prepositions used with such a term like with and about. For the purpose of appropriate use, the dictionary also tells us that “with” is used with people and “about” with things.

What comes next is a registration of all possible items or terms or entries that would come under such a heading (feeling angry). And those would be synonyms of the main entry “ANGRY”.

The dictionary lists: (mad), (annoyed), (furious), (livid), (offended), (cross), (fed up with) and (sick of).

As far as these synonyms are concerned, the dictionary tells you whether one is used by American speakers of English (American English) or by British speakers of English (British English). For instance, “mad” is American. Furthermore, it tells us that such a term is informal; and it is more frequently used in spoken English rather than the written one:

For example, Come on Maria,
What are you so mad about?

Highlighting and illustrating collocating prepositions and grammar patterns can be found with every entry in the dictionary. For example, the prepositions that collocate with “furious” which is one of the synonyms of “angry” are “with”, “at” and “about” with each one being exemplified.

Potential errors are also highlighted along with avoidance or remedy strategies. The dictionary, for instance tells: “Don’t say (very furious; say absolutely furious)

Formality or informality is clearly indicated. For instance “fed up with” and “sick of something” are informal.

“become angry” is used in written form, but in frequently daily use the term used is “get angry” or “get mad” which are the usual expressions.

The other six headings that explain the entry “angry”

- to become angry, with the following subheadings:

* get angry

* get mad

* lose one's temper

* throw a tantrum

- behaving in an angry unfriendly way with the following subheadings:

• bad tempered

• be in a bad mood

• grumpy/ grouch (informal)

• moody

• irritable

• touchy

• sulky

- someone or something that makes you angry

- annoying
- irritating
- frustrating
- be a nuisance (spoken)
- to make someone angry:
 - annoy
 - irritate
 - offend
 - get on somebody's nerves (informal)
 - drive somebody crazy (British informal spoken)
 - Provoke
- angry feelings
 - anger
 - rage
 - frustration
- to talk angrily to someone because they have done something wrong:
 - tell somebody off (a phrasal verb)
 - yell at somebody (American English)

Each one of these subheadings i.e. meanings is followed by an example of the language used in real life situations. That makes a reader or a translator get exactly the intended meaning in a text spoken or written.

The entry "ANGRY" can be fully seen in the following pages as it was laid out in the dictionary.

quantity /kwɒntəti/ [kwɒn-] (n C) a number of things – use this especially to talk about things that are being sold, stored, or carried

a quantity of A man was loading a quantity of TV sets onto the back of a truck.
a large quantity Customs officers discovered a large quantity of cigarettes in his baggage.

△ Quantity can be used in the plural with the same meaning: 'large quantities of weapons' means the same as 'a large quantity of weapons'.

be/feel sorry for sth (=sorry for something bad you have done) I hope you're sorry for the trouble you have caused.

There are certain entries the dictionary treats as BANK words. One such example is “newspapers and magazines”. The dictionary registers the following main headings to explain them:

- general terms: (paper), (local paper), (the press), (magazine), (the media), (tabloid), (the popular press), (comic)
- parts of a newspaper or magazine (headline), (fashion, sports paper), (letter page) etc.
- what is written
- people who work for newspaper and magazine
- readers

The following pages illustrate that thoroughly:

Students are advised to translate whatever is in bold type into Arabic together with the examples stated.

NEWSPAPERS AND MAGAZINES

1 newspapers and magazines

newspaper/paper /ˈnjuːspəpə/, 'peɪpə/ 'nuːz/ [n C] a set of large folded sheets of paper containing news, articles, pictures etc, which is printed and sold every day or every week: *Can I have a look at your newspaper, please? It says in the paper that they're getting divorced.*

Don't confuse newspaper and journal. A journal is a serious magazine on a particular subject, containing articles by university teachers, scientists, doctors etc: *the British Medical Journal* | *Their research was published in a scientific journal.*

Sunday paper /ˌsʌndi 'peɪpə/ [n C] a paper that is sold every Sunday, and is usually bigger than papers sold on other days: *I like to sit in bed and read the Sunday papers.*

local paper /ləʊkəl 'peɪpə/ [n C] a newspaper that gives news mainly about the town or area where it is printed: *Did you see Dave's picture in the local paper?*

magazine /ˈmæɡəziːn/ [n C] a large, thin book with a paper cover, often printed on shiny paper, which contains stories, articles, photographs, and sometimes also news: *I bought some magazines for the journey - Cosmopolitan and Vanity Fair.* | a photography magazine | a magazine for people interested in gardening.

women's magazine (=a magazine intended especially for women)

write /raɪ/ [u I/T] to write news reports or other articles for a newspaper or magazine: She writes articles about health for a women's magazine.

+ for He's been writing for the Evening News ever since he left college.

NEWSPAPERS AND MAGAZINES continues on the next page

NEWSPAPERS AND MAGAZINES

report /rɪ'pɔ:t/ [v I/T] to find out and write about news stories for a newspaper or news programme: We try to report events as fairly as possible.

+ on She was sent to Bangladesh to report on the floods there.

+ that The newspaper wrongly reported that he had died.

cover /'kʌvə/ [v T] to report the details of an event or a series of events for a newspaper or news programme: She was in New York to cover the St Patrick's Day celebrations. † Baxter had spent three weeks covering a big murder trial.

people who read newspapers and magazines

reader /'ri:ðə/ [n C] someone who reads a particular newspaper or magazine: We'd like to wish all our readers a very happy Christmas! † 2000 Cosmo readers took part in a survey about student life in the nineties.

readership /'ri:ðəʃɪp/ [n U] the number of people or type of people who regularly read a particular newspaper or magazine: The paper now has a readership of over 1.5 million. † The paper has a mainly middle-class readership.

circulation /sɜ:'kjʌleɪʃən/ [n U] the number of copies of a newspaper or magazine that are sold in a day, a week, a month etc: Circulation fell dramatically when the price of the magazine went up to \$4.00.

vocabulary

biased /'bi:zɪd/ [adj] a biased report or article is unfair, because it strongly supports or strongly opposes one particular group, opinion etc, and it does not give all the facts: a biased newspaper article about the election campaign

+ towards/in favour of Much of the British press is biased in favour of the Conservative Party.

+ against They complained that the news report was biased against the police.

censor /'sensə/ [v T] to take out the parts of a written article, a television programme, a film etc that you do not want other people to read, see, or hear because you think the information is politically dangerous or immoral: During the war, all newspapers and magazines were censored.

censorship /'sensəʃɪp/ [n U] when a government or an official organization controls what people are

freedom of the press

Most people feel that freedom of the press is very important. It means that newspapers can report what they like, can criticize the government, and can carry out investigative journalism without worrying that they are breaking the law.

Where there is no freedom of the press, people are often not told the truth about what is really happening. Governments can use newspapers for their own propaganda, and can censor facts and opinions that they do not want people to read about.

asked to read in newspapers, watch on television etc: The government soon imposed strict censorship on the press.

copy /'kɒpi/ [n C] a single newspaper: How many copies does the New York Times sell?

+ of There's a copy of yesterday's Guardian around somewhere.

freedom of the press /'fri:dm əv ðə pri:s/ what newspapers are allowed to write about whatever they want, and to give whatever opinions they want, without there being any laws to stop them: The new government has promised to allow complete freedom of the press.

intrusive /ɪn'tru:sɪv/ [adj] affecting or concerning people's personal lives in an annoying or upsetting way: The family found many of the questions intrusive and sometimes offensive.

NEWSPAPERS AND MAGAZINES

But in some cases, the newspapers themselves do not always tell the truth about what is happening. They sometimes try to influence people's political opinions, and newspaper reports can be biased. Many newspapers are more concerned with sensationalism than with serious news reporting, because this helps them to sell more copies of the paper.

In some countries, however, it can seem as if the press has too much freedom. Famous people sometimes feel that newspapers are intrusive, and print too much about their private lives. Many countries have laws that are designed to protect people's privacy.

If newspapers print something that is untrue about someone, they can be charged with libel, but this can still mean that people's lives, families, or jobs can be seriously damaged.

Investigative journalism/reporting /ɪnˌvɛstɪˈɡeɪʃən, rɪˈpɔːtɪŋ-ɡæʊ-/ when journalists use their skill and determination to try to discover the truth about something serious that someone else is trying to keep secret. President Nixon resigned after some excellent investigative reporting by two Washington Post journalists.

libel /lɪˈbəl/ [n U] when a newspaper or magazine writes something untrue about someone. He's suing the magazine for libel after they accused him of being a Nazi sympathiser. (-be is taking the magazine to a law court to prove that they are guilty of libel)

privacy /ˈprɪvəsi, ˈprɪ-faɪ-/ [n U] the idea that a person, especially an important or famous person, has the right to have a normal life with their family and friends, without newspapers telling people everything about them. Though she's on interna-

tionel superstar, she says her privacy is still very important to her.

private life /ˈprɪvət ˈliːf/ [n C] the way you live your life and what you do with your friends and family, rather than the things you do as part of your job or official position: I think that what politicians do in their private lives is their own business.

propaganda /ˈprɒpəɡendə/ [n U] the use of newspapers, television, film etc to make people believe things that are not true, for example by giving only some of the facts or by giving false information about an opponent. Early reports of the massacre were thought to be Communist propaganda.

sensationalism /ˌsensɪˈeɪʃənɪzəm/ [n U] a way of reporting events or stories that makes them seem as strange, exciting, or shocking as possible. The Daily Planet was accused of sensationalism in its reporting of the trial.

Chapter Five

Dictionaries and Idiomatic Expressions

Idiomatic expressions in any language are not only language-specific but culture-specific as well. Because they are culture-specific, they got the feature of idiomaticity. They reflect something quite peculiar to a particular language linguistically and culturally. Being language-specific means that such expressions do not lend themselves to the traditional rules, laws and norms; non-idiomatic expressions do. For example, one cannot passivise a sentence containing the expression "kick the bucket" (to die)

- He kicked the bucket (died)

Cannot be "the bucket was kicked by him"

The meaning of "kick the bucket" is one word "die" but it does not behave like one word; one cannot say "he kick the bucketed"

Other grammatical operations may not either have a chance of being applied to idiomatic expressions. The elements making up a phrasal verb (V + particle) which is idiomatic in English ... such elements cannot be separated always; if

they do, the element following the verb most of the time is a preposition not a particle: e.g. go up "climb"

- The old lady cannot go up steps.

We cannot say

- The old lady cannot go steps up.

The meaning of the individual elements comprising an idiomatic expression like "kick the bucket" does not help understand the overall meaning of the idiomatic expression "bucket" for instance has nothing to do with death, nor does "kick.

There are other ways to express the idea of death idiomatically in English.

- Pass away
- Pass over
- Pass on

All are euphemisms in English. The equivalences of such terms in Arabic are:

ينتقل إلى رحمة الله تعالى - يتوفى - يموت

The closest to "kick the bucket" in Arabic is "يفطس".

A translator from English into Arabic does not find difficulty in translating almost every verb he encounters. English, however, has generated a huge inventory of

phrasal verbs (V + particle) with a wide spectrum of meanings.

A word like "talk" with its meanings as a verb and as a noun is known but how many translators know the following meaning is not known:

- talk back يجيب بفظاظة وقلة احترام
- talk big يتبجح
- Talk down يفحم - يسكت بالحجة
- Talk out يوضح خلافات ويسويها مباشرة
- Talk over يقتعه بوجهة نظره
- Talk sense يقول كلاما منطقيا
- Talk turkey يتكلم بفظاظة
- Talk up يدافع عن - يزيّد

How often do we take for granted a verb like "take"? How many translators know the following collocations or phrasal "take" verbs without a dictionary:

- take it upon oneself يأخذ على عاتقه
- take up with ينهمك - يولي
- take up for ينحاز له - يزيّد
- take after يحنو حذو
- take out يخرج - يزيل

- Etc.

See if you can figure out the meaning of the following terms:

- pull away
- pull down
- pull for
- pull in
- pull out
- pull off
- pull over
- pull around
- pull through
- pull up
- pull up with /to

The Oxford Dictionary of Current Idiomatic English has thirteen pages on the entry "go" and other elements following it. Few will be selected and possible translations for this selection will be provided.

Try to give the closest natural and idiomatic equivalence of those not provided with translations.

- go under the hammer يُباع بالمزاد العلني

- go to the wall ظهره الحائط - مهزوم
- go through the motion يمشي مع التيار
- go round يكفي
- (there is enough coffee to go round)
- go in for
- go into one's act
- go by
- go beyond a joke
- go beyond one's duty.

Dictionaries of Idiomatic expressions indicate in addition to the formal standard use usages which are treated as informal. They also point out where such an idiomatic expression is used (American, British, Australian, etc.)

Example:

Talking about “go”

An idiomatic expression like:

- go to hell, which is looked at as an informal expression meaning: اذهب إلى الجحيم or in informal Arabic الجهنم .
- Another informal expression is: go off at half-cock كالذي أراد معاودة القرية

Sometime a term from slang is included “go for a Burton” = be killed.

The following pages are on “make” and whatever follows it.

Translate the main entries into Arabic after you read the dictionaries explanations and exemplifications of each entry.

lose one's hold over — make a song and dance (about/over)

after the small neighbourhood shop is bound to lose out. \square The hard way, the grind, the moral lesson, duty, all were losing out to the easy way, money, charm, a well-known name. ASA

mark up¹ (B1 non pass adj) (in retail trading) decide the selling price of sth after taking into account all the costs to oneself (charged by the manufacturer, wholesaler etc); (in overseas

Translating idiomatic expressions by a native speaker of Arabic specializing in translation is not an easy task because of the fact that such expressions as stated earlier are both linguistic and culture specific.

Due to the less exposition native speakers of English have to Arabic, such a translation would find more difficulty translating those idiomatic expressions.

The matter is not restricted to idiomatic expressions which are looked at as "pure idioms" by some, but rather to collocations of Arabic into English. The source of difficulty comes from the fact that each language collocates items the way it sees fit conventionally and traditionally over the years.

We do not know how a translator would approach the following expression:

متوقد الذهن

Dictionaries have used:

- sharp witted
- witty
- sharp
- smart

- intelligent
- bright
- brilliant

All are likely alright, but can we say for instance “with a glowing mind”?

Is it in use in English? Do native speakers use it? These are questions a translator has to investigate.

Now, how can a translator approach a term like **قدر** in the following contexts:

- **قدر قيمة المنزل بمليون**

Is **قدر** here estimate, assess, evaluate, value, or valueate?

- **قدر الرجل حق قدره**

Is it appreciate, esteem, value highly, prize, cherish?

- **قدر الظروف جيدا**

- **قدر الوضع جيدا**

Is it appreciate, understand, take into consideration/account?

- **قدر ان احدا ان يرد عليه**

Is it suppose, assume, presume, think, believe, consider, guess, anticipate?

- **قدر الله وقضى**

Is it predetermine, predestine, foreordain?

- لا يقدر بشئ

Is it priceless, invaluable, immense, huge?

- لا قدر الله

Is it God forbid?

The terms belong to the same semantic domain implying putting one evaluative mental power into something.

Look up the entry لوحة in the bilingual dictionary as an example of Arabic.

Chapter Six

Dictionaries and non-standard language

Like any other language, both Arabic and English have their standard form which is the language of academic and official use. Arabic even goes beyond the classification of standard and non-standard forms. There is the so-called classical Arabic which is the language of the holy Quran and classical literature. There are also the varieties of spoken Arabic that do not only limit themselves to different Arab countries but go as far as cities or towns varieties of Arabic.

English also has its standard and non-standard varieties. The non-standard is usually referred to as the colloquial variety. It also varies from one English speaking country or city to another.

The terms of the colloquial form of language should in one way or another have their roots in the standard or common language used by a speech community. Some terms are, however, completely new. Today's colloquial or slang in

English has their roots in what is usually called the under world.

Slang developed to include words and phrases that pertain to particular professions: plumbers, businessmen, lawyers, doctors, teachers etc.

Many tend to consider the terminology used in these professions as specialized terminology not as colloquial or slang.

Translators consulting ordinary dictionaries in their work would rarely find those dictionaries to have included slang or colloquial terms.

When they encounter a particular term of this kind they are advised to resort to dictionaries specialized in slang or colloquial language: *Oxford Dictionary of Modern Slang* (1992) by John Simpson is one example. Another is *The Dictionary of Contemporary Slang* (1992) compiled and revised by Jonathan Green. A third one is *Historical Dictionary of American Slang* by J.E. Lighter (1994).

Translators, however, are advised to avoid the use of slang or colloquial language in their translation.

Dictionaries specialized in slang specify where, by whom and sometimes the history of slang items. The term "hit the road" according to *The Dictionary of Contemporary Slang* (1992) came into use in 1975. It means "to leave" or "to set out on a journey".

If it is to be translated into Arabic, one will not feel comfortable that his translation is idiomatic or natural if he uses "يغادر" or "يرتحل", but the closest natural and dynamic equivalence of "hit the road" as a slang is the Arabic slang "يفركها".

Another term which is widely in use in Arabic for secrecy purposes is "الأخضر". If one is to translate this term into "the green" he would feel that the term "the green" is meaningless unless the conventionally agreed upon meaning by users of this term is known. The term is used to refer to "the dollar".

A slang dictionary contains such an entry but the term used is "long green" which is used in colloquial English to refer to "money" and it is the colour of dollar bills.

An expression like "مسبح الكارات" may sound to be an idiomatic expression, but in reality it is slang or colloquial. The equivalence for such an expression in English has nothing to do literally with the term in Arabic. In English it is "The Jack of all boxes" or "Jack of all trades".

Another expression like "hold your horses" has its counterpart in Arabic as "خذ على رأسها" which has taken a dimension of the English expression "horse", and a horse is held from its head.

As far as the social and historical aspects of slang terms, dictionaries of slang tend to include the date, the context of use, the social strata using the term and the country/countries where the slang term is used.

The slang term "ig man" is used by blacks in the U.S. It is an abbreviated form; it means an ignorant man.

A term like “no picnic” is used in the United Kingdom and Australia to refer to an unpleasant experience. The term, to a great extent, is self-explanatory.

There are terms, however, whose individual parts, if they are made up of more than one word, or when they are individual items, cannot be self-explanatory. This is the case of the majority of slang terms.

“to have one’s back teeth afloat” with its five words has nothing to do with drinking too much alcohol. It means “to be very drunk”.

The closest translation for such a term is “مطفي”. If one is to translate “مطفي” into English, one will resort to some sort of fire or putting off fire and this has nothing to do with the source term.

On the other hand, the meaning of an expression like “to have one’s head up on one’s ass” may be deducted from the concept the expression conveys rather than from its

individual elements. The meaning is “to be completely and deliberately stupid”

A slang term like “patch” which means “arrange for brides to be paid or corrupt deals to be made” cannot be understood as an individual item because it is so distinct from the action it refers to.

There are slang terms whose meanings touch upon one semantic dimension of the term used. For instance the word “pie” is expected to be delicious, soft and tasty. It is used by U.S. university students on campuses to refer to an attractive sexually desirable female.

The following are pages from the “*Dictionary of Contemporary Slang*”. Try to:

1. translate each entry into the closest Arabic slang equivalent.
2. specify the history of each term.
3. specify the relationship between the slang term and standard terms if they exist.

Seale.
forbidden fruit n. an underage sexual partner (cf: jail bait).
for crying out loud! (euph.) for Christ's sake! *Manner.*
for days (homosexual excl.) implies shock or amazement; fr. concept of having sex on and on for days *Stanley.*

Dictionaries and Academic Disciplines

Specialized Dictionaries

Although a translator's main concern is language and what it means, he is supposed to know the intricacies, specifics, idiomaticities and specialized terminology implemented in the learned or academic discipline he is dealing with. Precision and clarity are of paramount importance when the translation is one of a specialized academic field.

If a translator encounters the following sentence:

"... a field withdrawn from the jurisdiction of international law"

The political and legal terminology in this text has to be precisely rendered. The word "field" in this particular context is not **حق** because such a word has to be idiomatically rendered in accordance with the discipline it is being used in. The more appropriate term for "field" in this particular context is **مجال**. A term like "withdraw" which can be taken for granted by a translator has to be

rendered appropriately. It is not مستحجب , or مسحوب , or مترجع , but in this particular context it is "لا يخضع".

The one that constitutes a real problem probably is the term "jurisdiction" which plainly means "قوة القانون". But if the translator uses the term "قوة" here, it will sound odd, especially if we investigate the occurrence of the term in a context like:

"The matter falls within his exclusive jurisdiction"

we cannot say

"الأمر يقع في قوة قانونه المطلقة".

"jurisdiction" in the previous sentence means "سلطان" ; the sentence would best be rendered as "... مجال لا يخضع لسلطات " and the second sentence is not "... يقع في قوة " "القانون الدولي" but rather "يدخل الأمر في اختصاصه وحده" "قانونه المطلقة".

In a phrase like "... one of the hot beds of rebellion", the problem for a translator is not the possibility of resorting to a literal translation for a term like "hot bed" which is taken for granted as something known, and rendered as "مركز دافئ". The problem is in the term "rebellion". Is it "تمرد", "ثورة" or "عصيان"? First when the two terms "hotbed" and

rebellion collocates, "hotbed" cannot be "سرير دافئ", but most probably "وكر", and the phrase cannot be "وكر الثورة", or "وكر العصيان". The best would be "وكر التمرد".

The following pages are taken from a trilingual dictionary, Dictionary of Modern Political Idioms (English, Arabic and French) compiled by Majdi Wahbi and Wajdi Ghali, 1978. See if you can come up with better translations than the ones given in the dictionary.

O

object (v.)

6003 To object to this tendency to undermine the principle of ...

Protester contre ces velléités d'atteinte au principe de ...

يُعارض هذا الميل إلى تقويض أو تقويض مبدأ

object (n.)

6004 Novation by change of object.

La novation par changement d'objet.

التجديد بتغيير الموضوعات.

6005 To elicit (be an object of) sharp criticism.

Être l'objet de vives critiques.

يُعرض نقدًا لاذعًا.

يُعرض نقدًا حادًا.

6006 ... with this object in view.

— ... dans ce but.

— ... à cette fin.

... وهذا الغرض تُصَبِّحُ أغنيهم.

objection (n.)

6007 Objections to the procedure adopted were voiced by certain countries.

Certains pays ont exposé des objections contre la procédure adoptée.

عُثِرَتْ بِمَنْعِ البلاد عن اعتراضاتها على الإجراءات

التي تُقرَّرُ الأخذُ بها.

6008 To confine their objections within the narrowest limits.

Restreindre leurs objections dans les limites les plus étroites.

يُمنون اعتراضاتهم في أضيق الحدود.

objection, raise an

6009 It is only with some reluctance that the government has felt compelled to raise an objection on the ground that ...

Ce n'est qu'à contrecoeur que le gouvernement s'est senti dans l'obligation de soulever des objections pour des raisons de ...

قد اضطررت الحكومة على كثره منها أن نعرض على أساس ...

6010 Our delegation has no objection to raise. *Notre délégation n'a aucune objection à soulever.*

ليس لدى وفدنا اعتراض.

objection, take ~ to

6011 The only objection that can be taken to your plan is that ...

Le seul grief qu'on puisse faire à votre projet, c'est que ...

إن الاعتراض الوحيد الذي يمكن أن يُوجَّه إلى خطتك هو أن ...

objective (n.)

6012 The basic objectives of foreign policy.

Les objectifs fondamentaux de la politique étrangère.

الأنشطة الرئيسية للسياسة الخارجية.

6013 A complete identity of views between the two countries concerning the objectives and means for the settlement of the problem.

Une identité de vues complète entre les deux pays au sujet des buts et des moyens concernant le règlement du problème.

OBJECTIVE

- اتفاق عام في الآراء بين البلدين بشأن الأهداف
والوسائل الخاصة بشنوبه المشكلة.
- 6014 Mr. A thinks that he can reconcile these
two objectives by pursuing a policy of
...
Mr. A pense qu'il peut concilier ces
deux objectifs en poursuivant une po-
litique de ...
يعتقد السيد أ أنه يستطيع سبله ... يستطيع
التوفيق بين هذين الهدفين.
- 6015 A reappraisal of policies and objec-
tives.
Une nouvelle évaluation des objectifs et
des lignes politiques.
إعادة النظر في السياسات والأهداف.
- 6016 A speech setting out the purposes and
objectives of the conference.
Un discours exposant les objectifs de la
conférence.
خطبة توضح أغراض المؤتمر وأهدافه.
- 6017 Strictly military objectives.
Des objectifs strictement militaires.
أهداف عسكرية بحتة.
- 6018 There is broad agreement on the main
objectives.
Il y a une large mesure d'accord quant
aux objectifs principaux.
هناك اتفاق واسع النطاق على الأهداف الرئيسية.
- 6019 The use of force or the threat of force
to obtain his objectives.
L'emploi de la force ou de la menace
pour atteindre ses objectifs.
استخدام القوة أو التهديد بها للحصول على
أهدافه.

objective (adj.)

- 6020 An objective nation-wide poll gives A
54 per cent of the vote to B% 38 per
cent.
Un sondage d'opinion objectif répandu
par tout le pays attribuerait 54 pour
cent des votes à A contre 38 pour cent
à B.
استفتاء موضوعي على نطاق الأمة يعطي أ
بالنسبة من الأصوات ضد 38 بالنسبة لـ ب.

OBLIGATION

obligation (n.)

- 6021 Anxious to ensure respect for solemn
obligations and international under-
takings ...
Avec le souci d'assurer le respect des
obligations solennelles et des enga-
gements internationaux ...
مع إبداء الرغبة الأكيدة لضمان احترام
الالتزامات الراضة والتعهدات الدولية ...
- 6022 A convention of reciprocal obligations.
Les obligations qui résultent des traités
en vigueur.
اتفاق ملزم للطرفين.
- 6023 Existing treaty obligations.
Les obligations qui résultent des traités
en vigueur.
الالتزامات القائمة في المعاهدات القائمة.
- 6024 Obligations which are at variance with
the universally recognized principles
of international law.
Des obligations en contradiction avec
les principes universellement reconnus
du droit international.
التزامات تتباين مع المبادئ القانونية الدولية المعترف
بها عالمياً.
- 6025 Reparation for breaking an internation-
al obligation.
La réparation due pour la rupture d'un
engagement international.
التعويض (الواجب) عن خرق التزام دولي.
- 6026 To discharge his obligations.
Exécuter ses obligations.
يفوم بالتزاماته.
- 6027 To fail to meet one's obligations.
Manquer à ses engagements.
لا يفي بالتزاماته.
- 6028 To fulfil one's world-wide obligations.
Remplir ses obligations mondiales.
يفي بالتزاماته العالمية.
- 6029 To give rise to a contractual obligation.
Entrainer une obligation contractuel-
le.
يُنتج التزاماً تعاقدياً.

6030 To guarantee the discharge (fulfilment) of this obligation.

Garantir l'accomplissement (l'exécution) de cette obligation.

يضمن أداء هذا الالتزام.

6031 To refrain from acts inconsistent with treaty obligations.

S'abstenir de commettre des actes incompatibles avec les obligations découlant du traité.

يستنج عن أي عمل لا يتفق مع التزامات المعاهدة.

oblige (v.)

6032 In that event my government will be obliged to consider her own interests and to claim a free hand.

Le cas échéant, mon gouvernement se verra obligé de prendre ses propres intérêts en considération et de revendiquer sa pleine liberté d'action.

ستُطَلَبُ حكومتنا في تلك الحالة إلى مراعاة مصالحها الخاصة والتشكُّرِ بِمَنْحِها في حرية التصرف.

obscure (v.)

6033 To obscure the issue.

Embrouiller l'écheveau.

يُبْهِمُ الأمر.

obscure (adj.)

6034 The situation remains obscure in certain provinces.

La situation reste trouble dans certaines provinces.

تَبْلُغُ الحالة غامضة في أقاليم (مُحافظة) معينة.

observation (n.)

6035 To set up observation posts in sensitive areas.

Installer des postes d'observation dans les régions névralgiques.

يُغِيْمُ مراكزُ مُراقَبةٍ في المناطق الحساسة.

observe (v.)

6036 To observe the laws and customs of war.

Observer les lois et coutumes de la guerre.

يُراعى قوانين الحرب وعرفها.

6037 When asked about this matter, the spokesman for ... merely observed that ...

Interrogé à ce sujet le porte-parole de ... s'est borné à répondre que ...

وعندما سُئِلَ الناطقُ بِلسانِ ... عن هذا الموضوع أَبْدَى مُجرَّدَ مُلاحظةٍ بأن ...

observer (n.)

6038 He only agreed to attend the meeting as an observer.

Il n'a accepté d'assister à la réunion qu'à titre d'observateur.

لم يوافق أن يحضر الاجتماع إلا بِصفته مُراقِباً مُقتطعاً.

6039 In the view of some observers ...

A l'avis de certains observateurs ...

في نظر بعض المُراقِبين ...

6040 Many observers have warned us against jumping to conclusions.

Plusieurs observateurs nous ont mis en garde contre des conclusions trop hâtives.

فقد حذَرنا مُراقِبون عديدون من التسرع في الاستنتاجات (أكثر من اللازم) ...

6041 Observers here drew this interpretation from a passage of president A's speech.

Des observateurs ici tirèrent cette interprétation d'un passage du discours du président A.

استخلص المُراقِبون هنا هذا التفسير (التأويل) من فقرة من خطاب الرئيس أ.

6042 Observers here think that ...

Des observateurs ici estiment que ...

يظن المُراقِبون هنا أن ...

6043 Two observers then took the floor.

Deux observateurs ont ensuite pris la parole.

أُظْهِرَت السكينةُ بِتَشْيِيرِ لَاحِقين من الأعضاء المُراقِبين.

obtain (v.)

6044 B is canvassing to obtain the seat held by A.

- A brigue le siège occupé par A.*
يُنشئ ب للحصول على مقعد
- 6045 *An hour and a half of arduous (tough) discussion to obtain a unanimous vote.*
Une heure et demie de délibérations ardues pour obtenir un vote unanime.
مناقشات شاقة لمدة ساعة ونصف للوصول إلى تصويت بالإجماع
- 6046 *To obtain a settlement more in keeping with his views.*
Obtenir un règlement plus conforme à ses vues.
يصل إلى تسوية أكثر اتفاقاً مع آرائه
- 6047 *To obtain by force.*
Arracher par la force.
يَسْأَلُ بالقوة
- 6048 *To obtain diplomatic and political support.*
Obtenir un appui diplomatique et politique.
يحصل على تأييد دبلوماسي وسياسي
- 6049 *An unanimous agreement obtained through bilateral and multilateral conversations.*
Un accord unanime obtenu par des conversations bilatérales et multilatérales.
اتفاق بالإجماع تم التوصل إليه نتيجة محادثات ثنائية ومتعددة الأطراف
- 6050 *The use of force or the threat of force to obtain his objectives.*
L'emploi de la force ou de la menace pour atteindre ses objectifs.
استخدام القوة أو التهديد بها للحصول على أغراضه

obvious (adj.)

- 6051 *In spite of the obvious progress which ... has already caused democracy to accomplish ...*
En dépit des progrès évidents que ... a d'ores et déjà fait réaliser à la démocratie ...
برغم التقدم الواضح الذي حققه ... من قبل الديمقراطية ...

occasion (n.)

- 6052 *As occasion requires.*
Quand les circonstances le demandent.
كما تتطلب الظروف
- 6053 *... declared Mr. A in a speech delivered on the occasion of ...*
... a notamment déclaré M. A dans son discours prononcé à l'occasion de ...
كما أعلن السيد أ في خطاب ألقاه بمناسبة ...
- 6054 *Equal to the occasion.*
A la hauteur des circonstances.
كُنْ لهذا الموقف
- 6055 *The place (venue) of the next meeting is on each occasion determined by agreement at the conference.*
Le lieu de la réunion suivante sera chaque fois fixé à la conférence par accord mutuel.
مكان الاجتماع التالي يحدد في كل مناسبة باتفاق الأراء في المؤتمر
- 6056 *... sends his fraternal greetings and best wishes of success on the occasion of ...*
... adresse ses salutations fraternelles et ses vœux de succès à l'occasion de ...
يُشَلِّقُ بمناسبة ... بتحياته الأخوية وأطيب تيسانه بالتوفيق
- 6057 *Should the occasion arise ...*
Le cas échéant ...
إذا نشأ الأمر ...
- 6058 *To give an occasion for misunderstanding.*
Donner prise à une équivoque.
يُوجِدُ فرصة لإساءة الفهم
- 6059 *To rise to the occasion.*
Se montrer à la hauteur de l'occasion.
يُزَيِّعُ إلى مستوى الأحداث

occupation (n.)

- 6060 *To liberate (free) one's country from foreign occupation.*
Libérer son pays de l'emprise étrangère.
يُحرِّرُ بلده من الاحتلال الأجنبي

Another specialized dictionary is one on linguistics and phonetics compiled by David Crystal, first published 1980. It constitutes a comprehensive lexicographical survey of terminology on linguistics and phonetics.

In compiling any ordinary dictionary mono- or bilingual, one could use the techniques which have provided dictionaries of excellence such as the Oxford English Dictionary or Webster's. The process involves the routine scrutiny of texts from a range of contexts, the recording of new words and senses, and the systematic correlation of these as a preliminary to representing patterns of usage. Such a process can be applied for a specialized dictionary, but it will lack a great deal of specialization, especially with the endless flow of terminology in a particular discipline (such as linguistics in this case).

The specialized field of linguistics is no longer the interest of linguists, but the latter group is outnumbered by those who for private or professional reasons have developed more than an incidental interest in the subject. Translators probably are the ones most in need for such a specialized

dictionary. No one knows how true is the statement that says that the best translators are linguists, especially when they have developed a high degree of sensitivity towards language.

This popular demand has come from those for whom a conscious awareness of language is an integral part of the exercise of a profession, and upon whom the influence of linguistics has been making itself increasingly felt in recent years. (David Crystal, page 2, a first dictionary on Linguistics and Phonetics).

The editor himself said that not all linguistic terminology is included in his dictionary because it cannot all prove to be attractive to readers in linguistics or those interested in the field. Words like MORPHOLOGY, COMPETENCE, STRUCTURALISM cannot for instance be excluded because they turn up so often in students' early experience in the field. However, terms like ANTHROPOPHONICS, ALLOG, HYPERPLEXON, and PARAPHONOLOGY are unlikely to cause any problems because they cannot be encountered early by students or readers of linguistics.

The selection of material in the dictionary is simplified. At the same time, the editor did not find it necessary to include terms like the ALPHABET, ABBREVIATION, or ACRONYM because these are terms whose general sense any good dictionary would handle routinely. Words that have developed special senses due to their use in specific ways by linguists are included: "feature", "accent", "word" and "sentence".

Words related to the traditional approach of analyzing language, ones which are considered to be essential for grammatical descriptions are not included: "masculine", "feminine", "neuter", "definite", "indefinite", etc...

The dictionary does not either include items that belong to other disciplines unless linguistics or phonetics has introduced a special sense or a fresh dimension to their use- for instance, terms belonging to the logical or philosophical analysis of language.

The definitional parts of the entries by themselves were less illuminating than expected in a dictionary like this. The

editor, however, followed a more discursive approach with similar illustrations to capture the significance of particular items.

The entries accordingly contain encyclopedic information about such matters as the historical context in which a term was used (See following pages from the dictionary).

Each entry in the dictionary is self-contained with no obligatory cross references to other entries to complete the exposition of a sense. The editor preferred to work on the principle that, as most dictionary-users open the dictionary with a single problematic term in mind, they will be given a satisfactory account of that term as immediately as possible. The terms COMPETENCE is explained under COMPETENCE and PERFORMANCE under PERFORMANCE and so on without any cross referencing or problem causing for a reader or a translator in our case. A dictionary in his opinion cannot be treated or used or looked at as a textbook.

Within each entry of the dictionary, the main terms being defined are printed in bold face (along with their main inflection variants). Any other terms, less central to the exposition of the headword, are printed between quotation marks. Almost each entry is supplied by a specialized reference for further information if one is interested.

The following few pages contain terms used linguistically in a technical specialized meaning such as FAMILY, FEATURE, and FEEDBACK, MODE, SUPPLETION, etc. Try to find equivalent terms for them in Arabic.

F

factive A term used in GRAMMATICAL description to refer to a CONSTRUCTION or FORM (usually a VERB) denoting an action in which a cause produces a result, e.g. *make, kill, choose, elect* could be called 'factive verbs'. In CASE grammar, the term has special status, where it refers to the SEMANTIC CASE of the entity resulting from the verb's action, or understood as part of the verb's meaning, and is contrasted with AGENTIVE, DATIVE, etc. See Lyons 1977b: Ch. 12; Bolinger 1975: Ch. 15.

factive (factivity) A term used in the CLASSIFICATION of VERBS, referring to a verb which takes a COMPLEMENT CLAUSE, and where the speaker PRESUPPOSES the truth of the PROPOSITION expressed in that clause. For example, *know, agree, realise*, etc. are 'factive verbs': in *he knows that the cat is in the garden*, the speaker presupposes that the cat is in the garden. 'Factive predicates' may involve other classes than verbs: ADJECTIVES and NOUN CONSTRUCTIONS, for example, may display 'factivity', as in *it's surprising that he came, it's a shame that he came*. By contrast, non-factive constructions do not commit the speaker to the truth of the proposition expressed in the complement-clause, e.g. *believe, think*, as in *he thinks that the cat is in the garden*. Contra-factive constructions presuppose the falsity of the proposition expressed in the complement clause, e.g. *wish, hope*, as in *I'd hoped the cat was in the garden*. See Lyons 1977b: Chs. 14, 17.

falling/fall (1) A term used in classifying the linguistic uses of PITCH, referring to a movement from relatively high to relatively low. Falling tones of various kinds (e.g. 'high/low falling', 'falling-rising') may be encountered in the study of INTONATION systems and of TONE LANGUAGES. See Bolinger 1975: Ch. 3.

(2) A term used in a two-way classification of DIPHTHONGS (opposed to RISING), referring to cases where the first ELEMENT of the diphthong receives the maximum PROMINENCE. See Gimson 1970: Ch. 7.

family A term used in HISTORICAL LINGUISTIC studies to characterize a genetic model of the relationships between LANGUAGES. A 'family' of languages is the set of languages deriving from a common ancestor, or 'parent', e.g. the Indo-European family consists of the 'daughter' languages Sanskrit, Greek, Latin, etc. which all developed out of Proto-Indo-European. The family tree is a representation of these relationships devised by COMPARATIVE PHILOLOGISTS in the 19th century. See Bolinger 1975: Ch. 13; Robins 1971: Ch. 8.

favourite (non-) A term used by some LINGUISTS in the CLASSIFICATION of SENTENCE types to refer to the most PRODUCTIVE sentence pattern in a LANGUAGE. In English, the SUBJECT + PREDICATE (NP + VP) pattern is the favourite (or MAJOR) type, other types being referred to as non-favourite (or MINOR). See Quirk *et al* 1972: Ch. 2.

feature A term used in LINGUISTICS and PHONETICS to refer to any typical or noticeable property of spoken or written LANGUAGE. Features are classified in terms of the various LEVELS of linguistic analysis, e.g. 'PHONETIC/PHONOLOGICAL/GRAMMATICAL features' or in terms of a dimension of DESCRIPTION, e.g. 'ACOUSTIC/ARTICULATORY/AUDITORY features'. At the most general level, features may be classified as linguistic (or 'intralinguistic') as opposed to 'non-linguistic' (EXTRA-LINGUISTIC or METALINGUISTIC). At the most specific level, certain types of feature may be set up as the minimal UNITS of a theory, as in distinctive feature theories of phonology. In GENERATIVE grammatical analysis, the term has come to be associated with the way in which words are classified in the LEXICON in terms of their grammatical properties, such as [animate], [common], [masculine], [countable]. Such features are usually considered to be BINARY, as were phonological features, and analysed as [+animate], [–animate], etc. SEMANTIC features, likewise, can be handled in binary terms, as in the analysis of *spinster* as [+human], [+adult], [+never married] and [+female] (or, perhaps, [–male]). Features are sometimes referred to as COMPONENTS, especially in semantic analysis. See Lyons 1968: Ch. 7; Hyman 1975: Ch. 2.

feedback An extension of the technical use of this term in COMMUNICATION theory, referring to the process whereby the sender of a message obtains a reaction from his receiver which enables him to check on the efficiency of his communication. More specifically, some LINGUISTS have suggested it as a defining property of human LANGUAGE (contrasting with the properties of other SEMIOTIC SYSTEMS), whereby speakers are able to monitor their own PERFORMANCE (both by

metrics

metrics The traditional sense of this term – the study of versification – is interpreted in LINGUISTICS as the analysis of metrical structure using the whole range of linguistic techniques, especially those belonging to SEGMENTAL and SUPRASEGMENTAL PHONOLOGY. See Robins 1971: Ch. 9.

microlinguistic(s) A term used by some linguists, especially in the 1950s, to refer to the main areas of LINGUISTICS, especially PHONOLOGY, MORPHOLOGY and SYNTAX, these being seen as constituting a sharply defined field of study differentiable from PRELINGUISTICS and METALINGUISTICS. In this frame of reference, it was seen as a branch of MACROLINGUISTICS. More broadly, the term can be used to distinguish complementary views of a subject, one being strictly linguistic, the other being broader, e.g. a study of MEANING which concentrates on DENOTATIVE meaning and does not take SOCIOLINGUISTIC, etc. factors into account might be called 'microlinguistic' (as opposed to 'macro-linguistic') semantics.

The term 'microlinguistic' is sometimes used outside this framework in a general sense, to refer to any analysis of linguistic data involving a maximum depth of detail. Likewise, the term 'micro-sociolinguistic' (opposed to 'macro-') is sometimes found. See Crystal 1969: Ch. 2; Lyons 1977b: Ch. 14.

mid A term used in the three-fold PHONETIC classification of vertical TONGUE movement in VOWEL sounds, the others being 'high' and 'low'. It refers to vowels made in the middle area of ARTICULATION, as in *get*, *ay*, *go* or *gal*. See Gimson 1970: Ch. 4; Catford 1977: Ch. 9.

minimal-distance principle (MDP) A term used in PSYCHOLINGUISTICS, referring to a principle assumed to be generally applicable in the analysis of COMPLEMENT structures of the type *John wants Jim to go*, where the SUBJECT of the complement CLAUSE is *Jim*, i.e. the nearest NOUN PHRASE to the left of the complement VERB. Most complement-taking verbs conform to this principle (e.g. *like*, *hope*, *make*), which is used especially in child language studies to explain apparent anomalies in the ACQUISITION of complements and other similar types of STRUCTURE. For example, in *John promised Jim to go*, the subject of *go* is *John*: this breaks the minimal-distance principle, and it is hypothesised that children will have greater difficulty learning structures involving such verbs, since they constitute exceptions to the general rule. See Clark & Clark 1977: Ch. 9.

minimal free form A term introduced into LINGUISTICS by the American linguist Leonard BLOOMFIELD as part of his definition of

minimal pair

WORD. The phrase can be glossed as 'the smallest linguistic FORM which can stand on its own as an UTTERANCE'. See Lyons 1968: Ch. 3.

minimal pair (test) One of the DISCOVERY PROCEDURES used in PHONOLOGY to determine which sounds belong to the same class, or PHONEME. Two words which differ in only one sound are referred to as a 'minimal pair', e.g. *pin* vs. *bin*, *cat* vs. *cut*. A group of words differentiated by each having only one sound different from all others, e.g. *big*, *pig*, *rig*... is sometimes called a 'minimal set'. See Hyman 1975: Ch. 3; Bolinger 1975: Ch. 3.

minor A term used by some LINGUISTS in the classification of SENTENCE types to refer to a sentence (a *minor sentence*) with limited PRODUCTIVITY (e.g. *Please, Sorry*) or one which lacks some of the CONSTITUENTS of the LANGUAGE'S MAJOR (OR FAVOURITE) sentence type (e.g. VOCATIVES, ELLIPTICAL CONSTRUCTIONS). See Quirk *et al* 1972: Ch. 7.

misderivation A term used by some PSYCHOLINGUISTS to refer to a type of TONGUE-SLIP where the wrong AFFIX is attached to a WORD, as in *kingness* for *kingship*. See Clark & Clark 1977: Ch. 7; Bolinger 1975: Ch. 12.

MIT The abbreviation for Massachusetts Institute of Technology, used in LINGUISTICS as a label characterising GENERATIVE linguistic theory and method. The 'MIT school' is so called because of the influence of the work of Noam CHOMSKY and his associates at MIT since the late 1950s. See Bolinger 1975: Ch. 13.

MLU The usual abbreviation for MEAN LENGTH OF UTTERANCE.

modal(ity) A term used in GRAMMATICAL and SEMANTIC analysis to refer to contrasts in MOOD signalled by the VERB and associated categories. In English, modal contrasts are primarily expressed by a sub-class of AUXILIARY verbs, e.g. *may, will, can*. This sub-class is symbolised as M in the PHRASE-STRUCTURE RULES of a GENERATIVE grammar. In CASE grammar, modality refers to one of the two major CONSTITUENTS of a sentence's DEEP STRUCTURE, the other being PROPOSITION. See Lyons 1968: Ch. 7; Quirk *et al* 1972: Ch. 3.

mode (1) A term used in the HALLIDAYAN classification of LANGUAGE VARIETIES, referring to the MEDIUM of the language activity which determines the role played by the language in a situation. Mode (more fully, mode of discourse) primarily includes the choice of speech vs. writing (along with other possible sub-divisions, such as reading

suction

known as a **SUPERSTRATUM**. See Robins 1971: Ch. 8; Trudgill 1974: Ch. 3.

suction One of the features of sound set up by CHOMSKY & Halle in their **DISTINCTIVE FEATURE** theory of **PHONOLOGY**, under the heading of **SUPPLEMENTARY MOVEMENTS**, to handle variations in **MANNER OF ARTICULATION**. It refers to articulatory movements of the **GLOTTIS** or **velum** (cf. **VELAR**) where the air flow is directed inwards, as in **IMPLOSIVES** and **CLICKS**. See Ladefoged 1973: Ch. 11; Hyman 1973: Ch. 2.

suffix(-ing/-ation) A term used in **MORPHOLOGY** referring to an **AFFIX** which is added following a **ROOT** or **STEM**. The process of **suffixation** or **suffixing** is common in English, both for the **DERIVATIONAL** formation of new **LEXICAL** items (e.g. *-ise*, *-tion*) and for expressing **GRAMMATICAL** relationships (**INFLECTIONAL** endings such as *-s*, *-ed*, *-ing*). See Robins 1971: Ch. 5; Matthews 1974: Ch. 7.

superfix/suprafix A term used in **PHONETICS** and **PHONOLOGY** to refer to a vocal effect which extends over more than one sound segment in an **UTTERANCE**, such as a **PITCH**, **STRESS**, or **JUNCTURE** pattern, particularly when this is seen in the context of a specific **GRAMMATICAL STRUCTURE**. The term **SUPRASEGMENTAL** is however now widely used instead. See Bolinger 1973: Ch. 3.

superlative A term used in the three-way **GRAMMATICAL** description of **ADJECTIVES** and **ADVERBS** into **DEGREES**, specifying the extent of their application. The superlative form is used to express a comparison between more than two entities, and contrasts with **COMPARATIVE**, where only two entities are involved, and **POSITIVE**, where no comparison is implied. In English there is both an **INFLECTION** (*-est*) and a **PERIPHRASTIC** construction (*most*) to express this notion (e.g. *biggest*, *most interesting*). See Quirk *et al* 1972: Ch. 5.

superstratum A term used in **SOCIOLINGUISTIC** and **HISTORICAL LANGUAGE** studies to refer to a **LINGUISTIC VARIETY** or set of **FORMS** which has influenced the **STRUCTURE** or use of a less dominant variety of language within a community. A linguistic superstratum is usually the result of political, economic or cultural dominance, as illustrated by the influence of English, French, Arabic, etc. on the languages of the world at various periods in history. One of the most noticeable features of superstratal influence is the increased use of **LOAN** words. See Trudgill 1974: Ch. 8.

supplementary movements

supplementary movements One of the types of sound feature set up by CHOMSKY & HALLÉ in their DISTINCTIVE FEATURE theory of PHONOLOGY, to handle variations in MANNER OF ARTICULATION. They are sub-divided into SUCTION and PRESSURE types, a distinction made on the basis of the GLOTTAL OR VELAR movement involved in sounds with two simultaneous CLOSURES, as in EJECTIVES and CLICKS. See Ladefoged 1973: Ch. 11; Hyman 1973: Ch. 2.

suppletion (suppletive) A term used in MORPHOLOGY to refer to cases where it is not possible to show a relationship between MORPHEMES through a general RULE, because the forms involved have different ROOTS. A suppletive is the grammar's use of an unrelated FORM (i.e. with a different root) to complete a PARADIGM, as in the present-tense relationship of *go* ~ *went*, or the COMPARATIVE form *better* in relation to *good*. See Robins 1971: Ch. 3.

supraglottal A general term used in PHONETICS to refer to the whole area of the VOCAL TRACT above the GLOTTIS. See Ladefoged 1973: Ch. 1.

suprasegmental A term used in PHONETICS and PHONOLOGY to refer to a vocal effect which extends over more than one sound SEGMENT in an UTTERANCE, such as a PITCH, STRESS, or JUNCTURE pattern. In its contrast with 'segmental', it is seen as one of two main classes into which phonological UNITS can be divided. In American STRUCTURALIST theories, suprasegmentals were analysed as PHONEMES, and sequences of such features as MORPHEMES, but not all phonologists analyse these features in EMIC terms. Alternative terms are FLURISEGMENTAL, non-segmental and SUPERFIX. See Ladefoged 1973: Ch. 10; Bolinger 1973: Ch. 3; Hyman 1973: Ch. 6.

surface structure/grammar A central theoretical term in GENERATIVE GRAMMAR, opposed to DEEP STRUCTURE. The 'surface structure' (or 'surface grammar') of a sentence is the final stage in the SYNTACTIC REPRESENTATION of a sentence, which provides the input to the PHONOLOGICAL COMPONENT of the grammar, and which thus most closely corresponds to the structure of the sentence we articulate and hear. Analysing a surface STRING of MORPHEMES through CONSTITUENT analysis is a universal procedure which indicates many important facts about LINGUISTIC structure; but it by no means indicates everything, e.g. it cannot explain how we recognise AMBIGUOUS sentences, or how we INTUITIVELY relate sentences which have different surface FORMS but the same basic MEANING (e.g. *cats chase mice* and *mice are chased by cats*). For such reasons, linguists in the late 1950s postulated a deep

Chapter Eight
Bilingual Dictionaries
(Arabic- English and English – Arabic)

The most popular dictionary in the first half of the twentieth century is the Arabic- English/ English- Arabic Modern Dictionary by Elias Anton Elias. That work was so dominant to the extent that any other attempt on writing such dictionaries did not have much success.

The problem that encountered whoever worked on English – Arabic dictionaries was to find the equivalents for the influx of technical terms in English. Arabic is one of the richest world languages. English coined terms for the technical and scientific discoveries, inventions and other developments in all field depending on Greek and Latin roots. And some say that these roots have their roots originally in Arabic.

(See section on bases and affixes from Latin and Greek ... With little knowledge of ancient Arabic you will notice the similarity even identicalness).

Bilingual dictionaries are primarily concerned with giving equivalents, but they are not mere translations of the entries compiled in a dictionary of the source language. A compiler of an Arabic- English or English- Arabic dictionary does not only have to dig for the closest equivalent from the source language into the target language, he has to take into consideration the variation in cultural and thought patterns reflected in the languages at hand. If we take words like “أبحر، بحر، بخري، بحرية، بحر السنة، بحرة، بحيرة، تبحر” in Arabic, could the same root be the base for giving their equivalence in English? Does “تبحر في الموضوع الفلاني” have anything to do with “بحر”, or sea? What English words could stand for the many names of the Arabic words أسد، سيف، صحراء، صائغ، شهم، كريم

Words in bilingual dictionaries should be contextualized to reflect the vast rainbow of the senses a particular entry can have.

Those who combine dictionaries go through highly complicated process of selection, investigation, and analysis. This job is close to impossible to accomplish.

The process is so painful; it is like an unending maze... That is in mono-lingual dictionaries because the number of words in any language is almost infinite: which of this huge number of words to include and what are the suitable meanings to be used? The job becomes more complex in the case of bilingual dictionaries. That who compiles such a dictionary should not only be linguistically bilingual but almost bi-cultural, so that his/her work would be reliable, adequate and competent.

Dictionaries, mono or bi-lingual, are essential tools for a translator. A compiler of a bilingual dictionary (English – Arabic for instance) sometimes resorts to a monolingual dictionary (English- English, or Arabic – Arabic) to clarify a certain point he is making. A translator goes through the same process. That is why in translating we need to go to a monolingual dictionary in order to understand the nature of a particular term.

One of the bilingual English- Arabic dictionaries which is in the possession of almost every Arab studying English is ALMAWRED (المورد). This great work in which Muneer

Al- Balabaki must have spent sleepless nights and years of pain is not looked at as it deserves by critics of dictionaries for reasons we are not aware of. M. Enani supposedly a competent and well-established scholar says that “المورد” is the worst among such English- Arabic dictionaries; it is “very poor on usage and confused on definition. Its major flaw is due to the fact that in inception, it was an awkward translation of the Webster’s Collegiate Dictionary: in subsequent editions accretions were heaped up without any guidance on usage. It is especially disastrous to use if the translator is a beginner who has not acquired adequate knowledge of the various contexts in which a word may be used. An experienced translator may consult it only if accompanied by other English dictionaries...”

Not in defense of Al-mawrid, but the points raised by Enani against the dictionary lack a great deal of objectivity of truth. First with regard to poverty on usage, how do we explain Al-mawrid’s inclusion of the big number of meanings given to each entry? No entry could have ten to fifteen synonyms so that the dictionary editor or compiler would include. Take for instance an entry like “gauge” ;

first, the part of speech is specified: (noun) and (transitive verb), then the different meanings are listed:

١. (أ) قياس
 - (ب) سعة، مدى، حجم
 ٢. معيار، مقياس
 ٣. موقع السفينة النسبي بالقياس إلى سفينة أخرى وإلى الريح
 ٤. (أ) عرض السكة الحديدية
 - (ب) المسافة بين دولابين على محور
 ٥. (أ) سماكة صفيحة معدنية
 - (ب) قطر الشريط الخ
 ٦. (أ) يقيس، يمايز،
 - (ب) يعين سعة شيء
 - (ج) يقدر
 ٧. يمزج (الملاط) بنسب معينة
- (المورد: ١٩٩١، ٣٨١)

May be if Almawrid had said:

محمود يمزج الملاط بنسب معينة

would have been rich on usage.

These are the general contexts in which the term is used. Specific contexts are automatically included and cannot divert from the usages included.

Definitions in AlMawrid are not confused, the editor, Muneer Al-Balbaki spent thirty full years as a full time translator of not less than seventy books from English into Arabic. While translating these works, AlBalbaki consulted- as mentioned in the introduction to the 1992 edition of his Mawrid- many of the available dictionaries then. Those could not provide him with appropriate explanations or definitions for the terms or idiomatic expressions he encountered in the book he was translating. He used to register, on the margins of the dictionaries he used, the different terms or idiomatic expressions in use in such English works he was working on.

AlBalbaki did not think of writing a dictionary to add to what he described as "the golden valuable chain of available dictionaries (English – Arabic). He just wanted to make a special personal collection of terms, expressions and idioms Sa'ada, Elias and Madhar did not include in their English –Arabic dictionary available before AlMawrid.

Al-Mawrid cannot be a mere translation of Webster's dictionary as Enani claimed. It is so comprehensive to the extent that if you find yourself continuously consulting a specialized dictionary or an English- English dictionary when translating a text from a specific academic or scientific discipline, you find yourself satisfied with what Almarid provides you with on that particular field.

The entries in AlMawrid exceed one hundred thousand. The entries in the Webster, Enani talked about, do not exceed eighty thousand. This means that even if AlBalbaki relied heavily on Webster or even translated it, he must have made use of other sources, British, American mono-lingual dictionaries along with other specialized dictionaries.

The following two pages include the English dictionaries AlMawrid used along with abbreviations indicating the discipline, field, subject or area of study or science a certain term belongs to. These are around one hundred. And one can get around one hundred glossaries or dictionaries on different fields from Muneer Balbaki's AlMawrid.

* أضيفت في بعض النسخ على معجم Webster ومعجم Oxford كولينج ديكلينري The American College Dictionary

One would wish that M. Enani could provide Arabs interested or concerned with English with a better dictionary than the one he considers a disaster.

Here are few pages from Al-Mawrid in which some of the abbreviations indicating different disciplines are underlined. And to attest to the comprehensibility on the same pages there is a layout of the word "STAND" which is presented in such a rich way that can only be found in a specialized dictionary for idiomatic expressions in English.

Compare what is stated about the entry “STAND” in AlMawrid with how it is treated by a specialized dictionary of English idiomatic expressions.

Almawrid provides a user with almost all the information needed about a particular entry:

Pronunciation , syllabication, part of speech, meanings, usages, history, ...

A great deal more can be said about Al-Mawrid and its reliability , but its real appreciation is to be left to users and unbiased evaluators. This is no propaganda for the work/ the authors have never known the man / it is rather a reaction to an unjust treatment of a good work.

Another English – Arabic dictionary worthy of appreciation and use of is “ANNAFEES” النفيس COMPILED BY Magdi Wahba 2000.

The following facts can be stated about this dictionary:

- The main entries are registered in bald type followed immediately by
 - syllabication
 - transcription (with an exemplified guide to pronunciation on the bottom of every other page)
 - stress --placement on multi-syllabic words
 - sounds foreign to English are indicated

• and the form class an entry belongs to V, N, adj., adv.

- If an entry is colloquial, idiomatic or a figure of speech, it is indicated and given the closest equivalent in Arabic.

- The origin of words and phrases is indicated

- The dictionary also includes abbreviations that would simplify matters for translators.

- A collection of American – British variants together with a translation of these terms into Arabic.

- Last but not least is the inclusion of God's most beautiful names.

Samples of all what has been mentioned above can be seen in the following pages from "ANNAFEES"

in the ~ of the train	في مقدمة القطار	frontage ['frʌntɪdʒ] n.	واجهة (بناء أو قطعة أرض)
in ~	أماماً		تقريباً للواجهة
successful on all ~s	متنصر على جميع الجبهات	frontal ['frʌntl] adj.	المامي - ٢
	متنصر في جميع الجبهات	~ attack	هجوم مباشر
the home ~	الجبهة الداخلية	~ lobe	فص من الدماغ
go to the ~	ذهب إلى جبهة القتال	frontal n.	نظم الجبهة - ٢ - جبهة المذبح (المسبحة)
on a broad ~	على جبهة واسعة	frontier ('frʌntɪə, 'frʌntɪə) n.	الحدود
a sudden change of ~ (fig.)	تحول مفاجئ من موقف إلى آخر	the delimitation of ~s	تعيين الحدود
	٣ - طريق على الشاطئ ، كورنيش	a ~ incident	حدث على الحدود
drive along the sea ~	قاد سيارته في الطريق الممتد على شاطئ البحر	negotiations cutting across ideological	مفاوضات تتخطى المواقف المذهبية
	١ - حفاضة ، وقاحة ، نجاسة	the ~s of knowledge	فروع المعرفة
have the ~ to ...	بلغت به المصفاة أن ...	seal off the ~	عزلت عن الحدود
	٥ - مركز القيادة	frontierman ('frʌntɪəzmən) n.	يعمل على الحدود
come to the ~	تقدم إلى مركز القيادة	frontispiece ('frʌntɪspɪs) n.	الواجهة الكتاب
	٦ - واجهة سفينة	frost [frɒst] n.	تجميد ، جليد ، جمد ، زهرير
he is only a ~ for dishonest practices	ما هو إلا ستار يخفي وراءه عمليات غير أخلاقية	Jack Frost	تجميد مجيد
	٧ - جبهة جوية (أرصاد)	hear ~	يقع أبيض
front ['frʌnt] adj.	أمامي ، متقدم ، متقدم	~ heave	طعن التربة بفعل الصقيع
in the ~ rank	(أ) في الصف الأمامي (ب) في مكان القيادة	~ proof	مقاوم للصقيع
a ~ seat	مقعد أمامي	frost ['frɒst] v.t.	تجميد ، غشي بالصقيع
take a ~ seat (fig.)	احتل مكان القيادة	~ed food	غذاء مجمد
the ~ page of a newspaper	الصفحة الأولى من جريدة	~ed glass	زجاج متقشر
~ room	حجرة على واجهة المنزل	frost ['frɒst] v.i.	سوى بالسكر المسحوق
~ garden	حديقة أمام واجهة المنزل	frostbite ('frɒstbaɪt) n.	حرق ، حرق ، حرق ، متربة
~ wheel drive	دفع بالمحركات الأمامية (هندسة)		هجوم
front ['frʌnt] v.t.	١ - واجه ، أشل على	frostbitten ('frɒstbɪtn) adj.	مصاب ، معذب
windows that ~ the street	نوافذ مشاة على الشارع		تألمت بالصقيع
hotels that ~ the sea	فنادق تطل على البحر	frost-bound ('frɒstbaʊnd) adj.	متجمدة بأثر الصقيع
	٢ - غشي ، أغشى ... واجه	frostily ('frɒstɪli) adv.	بالغضب جاف ، بأسلوب غير ودود
a building ~ed with stone	مبنى له واجهة حجرية	frostiness ('frɒstɪnəs) n.	تفوق ، تقشع جاف
front (upon, towards) ['frʌnt] v.i.	أشل على	frosting ('frɒstɪŋ) n.	الثلج المنسوب

fruitful ['fru:tfl]	1- الإثمار 2- تحقيق الآمال	fruitful (fruitful) n.
fruitless ['fru:tles]	أغراض تفتقر	fruitless (fruitless) n.
fruit machine ['fru:tməʃɪn]	مخططات أدت إلى تحقيق	fruit machine ['fru:tməʃɪn] n.
fruit salad ['fru:t'sæləd]	مقبة الفاكهة المفصصة	fruit salad ['fru:t'sæləd] n.
fruity ['fru:ɪ]	غير مثمر ، غير مشير	fruity ['fru:ɪ] adj.
frustrate ['frʌstrəɪt]	محاولات عابثة	frustrate ['frʌstrəɪt] v.t.
frustration ['frʌstrəʃən]	آلة المقامرة	frustration ['frʌstrəʃən] n.
frumpy ['frʌmpɪ]	حلوى من الفواكه المختلطة	frumpy ['frʌmpɪ] n.
frumpy ['frʌmpɪ]	1- فاكهية المذاق 2- شبيهة بالفاكهة	frumpy ['frʌmpɪ] adj.
frustrate ['frʌstrəɪt]	3- قروي الفاكهة (في وصف البيض) 4- يذوي مثير	frustrate ['frʌstrəɪt] v.t.
frustration ['frʌstrəʃən]	رواية جنسية مثيرة	frustration ['frʌstrəʃən] n.
frumpy ['frʌmpɪ]	5- رتيق	frumpy ['frʌmpɪ] n.
frumpy ['frʌmpɪ]	صوت رتيق محبيل	frumpy ['frʌmpɪ] n.
frumpy ['frʌmpɪ]	الرغيف ، امرأة غردية تباث مرعوبة	frumpy ['frʌmpɪ] n.
frumpy ['frʌmpɪ]	مرعوب ، متوتر	frumpy ['frʌmpɪ] adj.
frumpy ['frʌmpɪ]	أحبط ، لبط ، ألبس خطبة ...	frumpy ['frʌmpɪ] v.t.
frumpy ['frʌmpɪ]	أحبطت محاولته أن ...	frumpy ['frʌmpɪ] n.
frumpy ['frʌmpɪ]	1- الإعياء ، التليط	frumpy ['frʌmpɪ] n.
frumpy ['frʌmpɪ]	7- أمر متخبط للآمال	frumpy ['frʌmpɪ] n.
frumpy ['frʌmpɪ]	فطيم ناقص ، شكل ناقص	frumpy ['frʌmpɪ] n.
frumpy ['frʌmpɪ]	فلي ، فلا ، حمر	frumpy ['frʌmpɪ] v.t.
frumpy ['frʌmpɪ]	فطيم	frumpy ['frʌmpɪ] v.t.
frumpy ['frʌmpɪ]	1- طبق طعام مثلي 2- صغار السمك	frumpy ['frʌmpɪ] n.
frumpy ['frʌmpɪ]	أقل الناس أهمية	frumpy ['frʌmpɪ] n.
frumpy ['frʌmpɪ]	بغلة ، غلاية	frumpy ['frʌmpɪ] n.
frumpy ['frʌmpɪ]	كالمستجير من الرمضاء	frumpy ['frʌmpɪ] n.
frumpy ['frʌmpɪ]	بالشار	frumpy ['frʌmpɪ] n.
frumpy ['frʌmpɪ]	1- الفوشيا ، نبات مزهر أحمر	frumpy ['frʌmpɪ] n.
frumpy ['frʌmpɪ]	أسكر ، أفند الرشد	frumpy ['frʌmpɪ] v.t.
frumpy ['frʌmpɪ]	السماطة	frumpy ['frʌmpɪ] n.
frumpy ['frʌmpɪ]	المستزمت	frumpy ['frʌmpɪ] n.
frumpy ['frʌmpɪ]	1- الفاذج ، (نوع من الحلوى)	frumpy ['frʌmpɪ] n.

holodeck ['holodek] n.	١- عتلة ، إجازة	٢- متحف صغير في الأرض
holodeck (ed) ['holodek] v.t.	في إجازة	جوف ، فرع ، قمر
holodeck-maker ['holodekmeɪkə] n.	يوم عيد ، عتلة عيد	أمر يري (تبات)
holocaust ['holəʊst] n.	عتلة عيد الميلاد	الخطيئة ، الخطيئة
holocaust ['holəʊst] n.	نفس عتلة (في)	أيات من التيارات
holocaust ['holəʊst] n.	مُعتل ، مالتج	هوليوود ، مدينة في ولاية
holocaust ['holəʊst] n.	قديسة ، قداة	كاليفورنيا اشتهرت بصناعة السينما
holocaust ['holəʊst] n.	قداة البابا	شجرة الزيتون
holocaust ['holəʊst] n.	قداة كشم	مادة بسن ، كابل ، نام ، نام
holocaust ['holəʊst] n. also wholism n.	نظرة	١- مجزرة عامة بالحرق
holocaust ['holəʊst] n. also wholism n.	نظرة الكُل على مجموع أجزاء	٢- حرق القربان مُبددة (في الوثنية)
holocaust ['holəʊst] n. also wholism n.	١- حاض نظرية تفرد الكل على مجموع أجزائه	٣- مجزرة عامة
holocaust ['holəʊst] n. also wholism n.	٢- مالتج للنفس والجسم معاً (طب)	٤- حزاب و زمار
holocaust ['holəʊst] n.	هولندا	٥- نسخة كاملة بخط المؤلف
holocaust ['holəʊst] n.	نسيج كشمي خشن (بنسب ، الدنور ،)	٦- جراب المُسدس
holocaust ['holəʊst] n.	في مصر	٧- مقدس ، قديس
holocaust ['holəʊst] n. pl. (sing. in constr.)	شرب	الكتاب المقدس
holocaust ['holəʊst] n. pl. (sing. in constr.)	الجن ، الهولندي المُسكر	فلسطين ، الأرض المقدسة
holocaust ['holəʊst] n. pl. (sing. in constr.)	نادي ، صرخ ، صاح	بيست المقدس
holocaust ['holəʊst] n. pl. (sing. in constr.)	هالو ! ، هيه ! ، هيه !	أسبوع الآلام (عند المسيحيين)
holocaust ['holəʊst] n. pl. (sing. in constr.)	صاح شادبا	العشاء الرباني ، العشاء
holocaust ['holəʊst] n. pl. (sing. in constr.)	١- أجوف ، مُجوف ، مُفرغ	البابا
holocaust ['holəʊst] n. pl. (sing. in constr.)	قوالب مفرغة	محاكمة التفتيش (في الكاثوليكية قديما)
holocaust ['holəʊst] n. pl. (sing. in constr.)	أجر مفرغ	الروح القدس
holocaust ['holəʊst] n. pl. (sing. in constr.)	كرة جوقاء	ماء مُغلى عليه

On his book on Dictionaries designed for the Open University in Cairo, M. Enani did not talk about Arabic-English dictionaries. We hope that Mr. Enani would not be surprised if it turns out that AlMawrid is the best bilingual Arabic English dictionary. And we hope he did not choose to ignore it because of its being so.

Rohi AlBalbaki, son of Muneer, is the editor of the Arabic-English AlMawrid. The effort exerted by the father on the English – Arabic dictionary seems to have been doubled in compiling the Arabic- English one by the son.

Thirteen years of full time work were exerted to issue this dictionary.

There are few facts about this dictionary that can be stated as follows:

- The dictionary is by no means a translation of the English- Arabic AlMawrid. Arabic lexical and semantic derivational systems are completely different from the English ones.
- Due to cultural and scientific development, many words have found their way into the Arabic language. The

dictionary accommodated these terms with their closest natural and dynamic equivalent in English.

- Archaic words in Arabic were dropped out from the dictionary. Concentration was on standard Arabic and words in common everyday learned use, with no attention paid to colloquial or non-standard Arabic.
- A word like ضيف does not have a place in this dictionary. A translator of المصطلحات should first consult an Arabic- Arabic dictionary then, after this, use this dictionary.
- Entries with multi - meanings were divided into branches each concerned with a particular meaning. Meanings are not jammed together, and the reader is left to choose what each meaning of a particular word is followed by a definition if there is one, an equivalent in English if the relationship is one to one.
- A great deal of attention was paid to idiomatic expressions.
- Exemplification was used to illustrate the use of an entry in everyday language.

- Few morpho- syntactic devices enriched the dictionary and constituted a great help to readers and translators alike.

- We note

• The addition of negative lexical markers like مرني or منطقي and غير مرني after غير منطقي , لا or غير منظور

• The addition of ي to derive adjectives from nouns and giving the meanings of these derived adjectives in English; example, مادي، قبلي، قاعدي، نظامي

Such derivations are usually neglected and their meanings are ignored in other dictionaries.

- There is cross referencing in the dictionary only when the term being defined has a synonym in the language defined or translated.

The following pages reflect a more in-depth view of how the dictionary is compiled and how it deals with various entries clearly, skillfully and comprehensively- all to the good luck of a translator. Just think of لوحة + لائحة، لا، لائحة، + لوحة

neither this nor that	لا هذا ولا ذلك
لا تؤاخذني، لا بد، لا جرم، لا شك، لا غير - راجع	أخذ، بد، جرم، شك، غير
بلا - راجع	بلا - راجع
to be slow, tardy; to tarry, linger	لأى: أبطأ
pearl dealer, dealer in pearls	لأاء: بائع اللؤلؤ
social, antisocial, unsocial, non-social	لا اجتماعي
list, roster, roll, scroll, register, (table, schedule, panel; manifest, index	لا لائحة (قائمة، جدول)
bill, draft law, draft of a law	لائحة: مشروع قانون
bylaw, regulation	لائحة: قانون داخلي، لائحة أو مؤسسة، نظام
rules of court	لائحة (محاكمة)
standing order	لائحة (داخلية في برلمان)
declaration; pleading; (الدعوى)، لائحة ادعائية	لائحة (الدعوى)، لائحة ادعائية
brief	لائحة: جوابية
plea; pleading	لائحة: جوابية
bill of indictment	لائحة: اتهام
price list	لائحة: أسعار
blacklist	لائحة: سوداء
menu, bill of fare	لائحة: الطعام
(outward) appearance; (look), aspect, mien	لائحة: مظهر، هيئة
immoral, unethical, wrong	لا أخلاقي
immorality	لا أخلاقية

truly, verily, really; certainly, definitely, surely, undoubtedly	ل: حقا، صريحا، حقا، بالتأكيد، بالتأكيد، بالتأكيد، بالتأكيد
